Other Reports That Might Be of Your Interest:

- [Telemedicine Market Report](#) - The telemedicine market value is estimated at USD 151.42 billion in 2023. It is expected to reach USD 290.01 billion by 2028, registering a CAGR of 13.88% during the forecast period (2023-2028).
- [Forensic Medicine Market Report](#) - The forensic medicine market is expected to register a CAGR of 12.01% during the forecast period (2023-2028).

Key Highlights from the Global Atopic Dermatitis Market Report:

Corticosteroids Segment to Dominate the Market

- Corticosteroids are referred to as medicines that are like cortisones and are generally used to reduce inflammation in the body. These medicines help reduce redness, swelling, itching, and allergic reactions.
- As per National Eczema Association (NEA), corticosteroids are the most prescribed medicine for eczema, as they help control itching and inflammation.

North American Market to Grow Significantly

- In the North American region, the United States is expected to hold a substantial share of the market. Major reasons for this are the increasing prevalence of atopic dermatitis and the rising awareness rate among patients in the United States.
- A recent boost in investments in atopic dermatitis prevention and cure contributed substantially to the growth of the market in the region. The estimated amount invested in atopic dermatitis research was USD 46 million in the year 2021 and USD 44 million in the year 2022.

What are the Latest Developments in the Global Atopic Dermatitis Market?

- In October 2022, a campaign was launched to raise awareness about atopic dermatitis across different cultures by Leo Pharma. This campaign included the journey of four different patients with chronic skin diseases from Spain, Germany, Italy, and France.
- In June 2022, USFDA approval was received by Sanofi for Dupixent (dupilumab) for children between the ages of six months and five years.
