About CURADIGM

Curadigm is an early-stage nanotherapeutic platform designed to disrupt the design and development IV-administered therapeutics and improve outcomes for patients. Curadigm’s Nanoprimer platform increases drug bioavailability while decreasing unintended off-target effects, specifically liver toxicity. The platform can be used with most intravenous (IV) therapeutics across multiple drug classes. Curadigm is dedicated to advancing therapeutic development based on our deep understanding of how drugs interact with the body, to impact both known and novel drugs across multiple clinical indications.
