

PRESS RELEASE

## US Signal Honored with 2026 MSP Today Product of the Year Award

*OpenCloud Honored for Exceptional Innovation and Successful Deployment Through The Channel*

Grand Rapids, Mich., May 24, 2026— US Signal today announced that its solution, [OpenCloud](#), has been named a 2026 MSP Today Product of the Year Award winner by TMC, a leading global media company recognized for building communities in technology and business through live events and digital marketing platforms.

The [MSP Today Product of the Year Award](#) honors standout products and services that are reshaping the managed services landscape—delivered through the Channel and purpose-built to meet the evolving needs of end users. OpenCloud was selected for its innovation, performance, and its measurable impact on customers and partners alike.

US Signal’s OpenCloud platform is designed to give organizations and managed service providers a more flexible, cost-effective alternative to traditional virtualization and public cloud environments. Built on Apache CloudStack and open-source technologies, OpenCloud delivers enterprise-grade Infrastructure-as-a-Service (IaaS) with predictable pricing, high performance, and greater operational control. The platform supports hybrid and multi-cloud strategies while helping organizations modernize infrastructure, improve scalability, and reduce reliance on proprietary platforms.

“OpenCloud was built to give organizations more control, flexibility, and predictability in how they deploy and manage infrastructure,” said John White, Chief Operating Officer at US Signal. “As businesses continue to reevaluate cloud strategy, virtualization costs, and long-term infrastructure planning, OpenCloud provides a modern platform that helps customers optimize performance while maintaining the freedom to evolve their environments on their terms.”

“It gives me great pleasure to recognize US Signal as a 2026 recipient of TMC’s MSP Today Product of the Year Award for their innovative solution, OpenCloud,” said Rich Tehrani, CEO of TMC. “Our judges were thoroughly impressed not only by the strength and features of the product, but by US Signal’s commitment to the Channel—empowering partners to deliver exceptional service and drive meaningful results for their clients.”

Winners of the 2026 MSP Today Product of the Year Award will be featured on MSP Today, the definitive resource for managed service providers, as well as across TMCnet’s media platforms.
