- Others: Quarterly fluctuate along with the scale of supplies costs
- Network operation-related costs: Decreased QoQ mainly due to decrease in maintenance costs, etc.

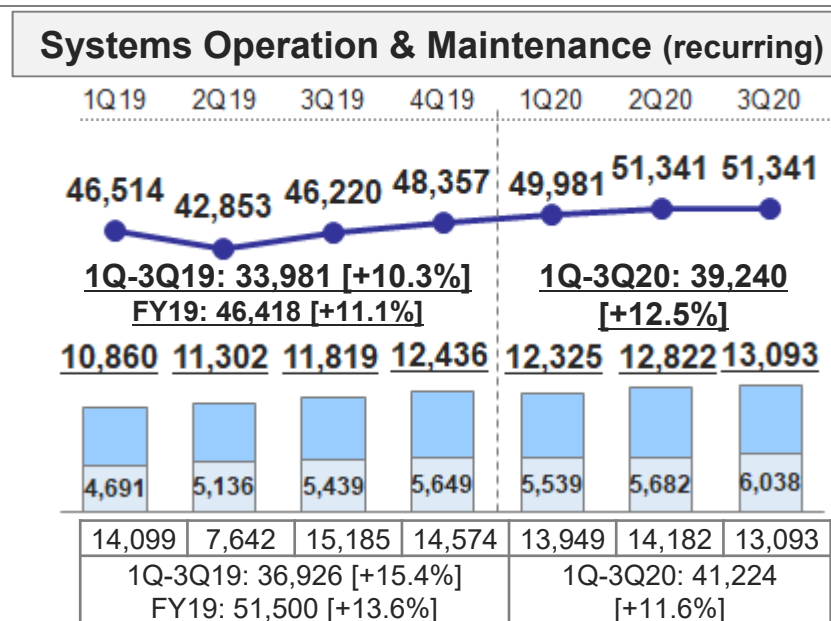

Regarding mobile interconnectivity cost recognition:

- Future cost method adopted from FY20(*). In this method, mobile interconnectivity telecommunications charge is calculated by MNOs' prediction for their future costs and etc.
 (*) The difference between prediction and result is adjusted to the next fiscal year
- Regarding our FY20 usage charge, we use 16.0% decrease, which has been publically disclosed by Docomo, to recognize our costs from 1Q20
- FY19 usage charge, an internal number of FY20 usage charge described above, which is based on Docomo's FY19 results decreased by 13.4% YoY (fixed in Jan. 2021). In 3Q20, we recognized ¥0.7 billion of profit due to the above decrease and others.

The internet started in Japan in 1992, along with IIJ. Since that time, the IIJ Group has been building the infrastructure for a networked society, and with our technical expertise, we have continued to support its development. We have also continued to evolve our vision for the future and innovate to make it a reality. As an internet pioneer, IIJ has blazed the trail so that others could realize the full potential of a networked society, and that will never change. The middle "I" in "IIJ" stands for "initiative," and IIJ always starts with the future.
