

NEW 4G LTE CONNECTED

TrakView[®] Dashcam

Track, monitor and protect your fleet with our new dual-facing dashcam.

TRACK

Real-time GPS location, status updates and trip insights for every mile driven.

MONITOR

Vehicle health alerts and tools to reduce downtime and repair costs.

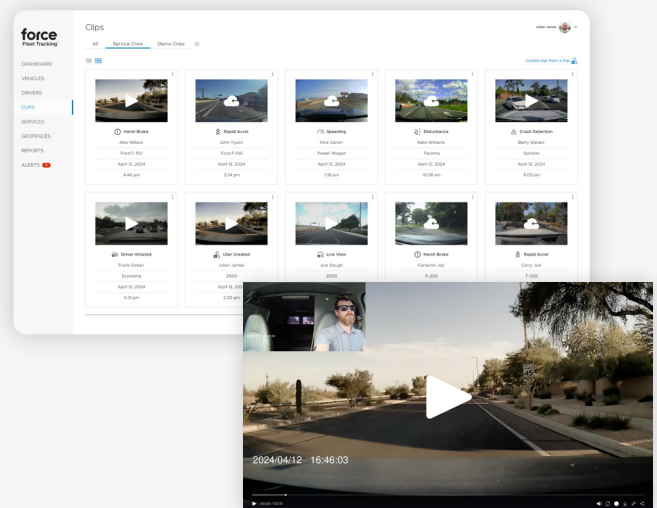

PROTECT

View and record what's happening inside and out of your vehicles, 24/7.

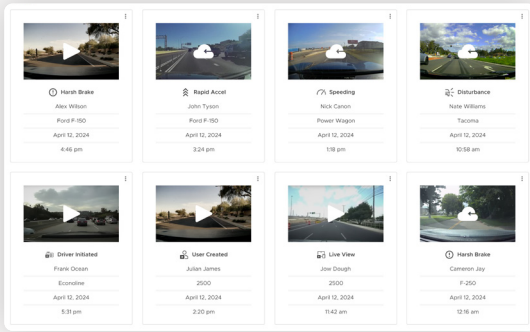

Reduce risk and protect your business with video!

- The TrakView Dashcam is OBD-II powered and uses 4G LTE connectivity to transfer video clips to the cloud for playback and storage.
- Dual-facing HD cameras capture video inside and out, and the included 256GB micro SD card stores up to 100 hours of video.
- Watch clips and activate Live View at the office or on the go with our mobile apps!

Simple and affordable fleet tracking solutions that get the job done.

Get the footage you need, when you need it.

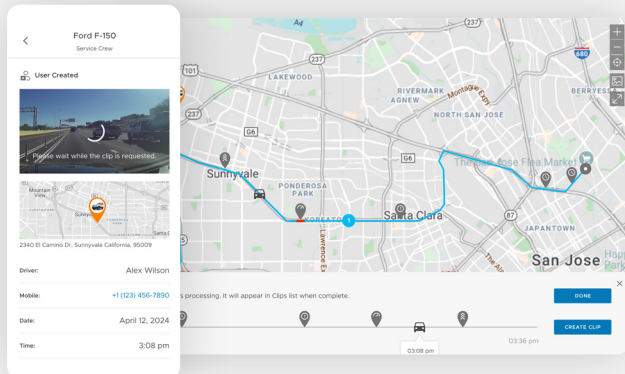

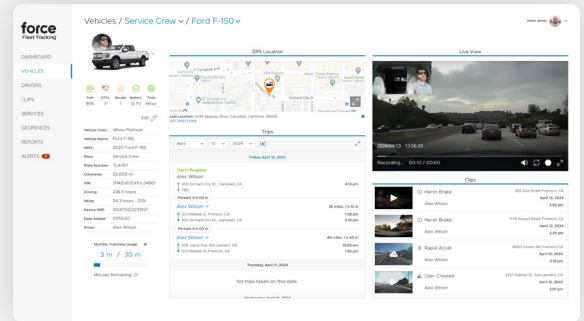

AUTOMATIC TRIP RECORDING

- Video is recorded during each and every trip
- Clips are automatically generated for accidents, unsafe driving behavior, break-in attempts, and other disturbances like bumps and towing.
- Easily transfer clips to the cloud to watch them in the web and mobile apps.

DASHCAM LIVE VIEW

- See what's happening inside and out of your vehicles from your phone or computer, 24/7.
- Live View is available on demand in the web and mobile apps - just select a vehicle and start streaming!

VIDEO CLIP FINDER

- Easily go back in time to find the video clips that matter to your business.
- Perfect for compiling evidence, confirming driver actions, or to validate customer reports.

Easy to install. Easy to use.

Simple setup - follow our in-app guide to complete the installation in just a few minutes

Stays stuck - our suction mount stands the test of time, but can be easily moved when needed.

Clean look - the included cable tuck tool makes for a professional-looking install without the hassle.
