

PRESS RELEASE

ePac Flexible Packaging's Boston Plant Receives SQF Certification *Safe Quality Food Certification Ensures Highest Standards Are Met*

January 21, 2019
Boston, MA

ePac Flexible Packaging, the industry leader in digital printing for flexible packaging, is pleased to announce that its Boston based manufacturing facility has received the Safe Quality Food (SQF) Program Certification. ePac Boston is the first ePac plant to receive this certification, recognized worldwide by retailers, brand owners, and food service providers as a rigorous and credible food safety and quality program. All ePac locations will eventually be certified.

The SQF certification will enable ePac Boston to meet the highest possible global food safety standards while demonstrating the company's commitment to manufacturing excellence. Recognized by the Global Food Safety Initiative (GFSI), the SQF certification and quality standards are designed to meet industry, customer, and regulatory requirements for all sectors of the food supply chain.

As a full-service printer/converter, ePac serves local and regional consumer packaged goods companies of all sizes, in particular, small and medium-sized businesses producing snacks, confection, natural and organic foods, pet food, herbal and nutritional supplements, and more. ePac ships orders in 10-15 business days, and offers sustainable film options with low minimums with the ability to order to demand to reduce inventory and obsolescence.

According to Tim Novak, Managing Partner of ePac Boston "Since we opened last year the reception to our unique value proposition has been great. Locally based small and medium-sized brands, many focused on offering healthy food choices, now can rapidly go to market with great packaging on par with global brands. SQF certification gives our customers the confidence that their packaging supplier is every bit as concerned about food safety as they are."

Established in 2016, ePac is the leader in short and medium run-length, quick turn pouches and roll stock for brands of all sizes. ePac is a full-service flexible packaging provider, with pre-press, digital printing that produces true high definition graphics quality, lamination, and pouch making all performed at ePac sites across the US and Europe.
