

## Wesdome Announces 2020 First Quarter Production of 25,122 Ounces of Gold Produced

TORONTO, April 16, 2020 (GLOBE NEWSWIRE) -- Wesdome Gold Mines Ltd. (TSX:WDO) ("Wesdome" or the "Company") today announces its gold production results for the first quarter of 2020 ("Q1").

Mr. Duncan Middlemiss, President and CEO commented, "First quarter production of 25,122 ounces was within budget, however grade was slightly lower due to stope sequencing. Mill feed increased by 34% to 735 tonnes per day compared to Q1 2019. With the COVID-19 pandemic occurring at the end of Q1 and subsequent health and safety actions taken, we expect slightly lower production in Q2 compared to Q1. As part of these health and safety protocols, we have shut down the Mishi Open Pit and have moved to a reduced workforce in other areas at the Eagle River Complex. Despite these reductions in activities, we are maintaining our full year production guidance of 90,000 – 100,000 ounces due to flexibility in stope sequencing. On behalf of management and the board of directors I would like to thank all employees for their cooperation and dedication in these unprecedented times. Currently the Company expects to resume drilling and development work at Kiena during the week of May 4, 2020 and the impact of this six week shutdown has significantly tightened our timeframe of getting to a restart decision by the end of 2020. The timing of this will be evaluated and communicated to the market in Q3."

Accordingly, the reader is cautioned not to place undue reliance on forward-looking statements. The Company has included in this news release certain non-IFRS performance measures, including, but not limited to, mine operating profit, mining and processing costs and cash costs. Cash costs per ounce reflect actual mine operating costs incurred during the fiscal period divided by the number of ounces produced. These measures are not defined under IFRS and therefore should not be considered in isolation or as an alternative to or more meaningful than, net income (loss) or cash flow from operating activities as determined in accordance with IFRS as an indicator of our financial performance or liquidity. The Company believes that, in addition to conventional measures prepared in accordance with IFRS, certain investors use this information to evaluate the Company's performance and ability to generate cash flow.*
