Monthly Commentary

- In connection with the preparation of our June and second quarter 2022 financial results, we wrote down \$224.8 million of goodwill assigned to our Property segment, which was primarily related to the 2015 acquisition of ARX Holding Corp. Based on our analysis, we concluded that the fair value of our Property segment is less than the current carrying value, primarily driven by reduced forecasted profitability given the magnitude of recent weather events, as well as other factors impacting our plans to restore our Property business to target profitability in a timely fashion. There is no indication of impairment on the remaining \$227.9 million of goodwill, which is primarily attributable to our Personal Lines Agency business and related to the ARX acquisition.

Events

Our second quarter Investor Relations conference call is currently scheduled to be held on Wednesday, August 3, 2022, at 9:30 a.m. eastern time. The call and webcast is scheduled to last 90 minutes and will begin with an approximate 45-minute presentation on the Property business, followed by a question and answer session with Tricia Griffith, our CEO, and John Sauerland, our CFO. We plan to file our Quarterly Report on Form 10-Q with the SEC on Tuesday, August 2, 2022. If the dates of our events, which are always subject to change, are rescheduled, we will announce the change in a press release as soon as practical and publish it on our investor website. Details regarding access to the teleconference, or any event changes, will be available at: <https://investors.progressive.com/events>.

We plan to release July results on Wednesday, August 17, 2022, before the market opens.

In addition, investors should be aware that generally accepted accounting principles prescribe when a company may reserve for particular risks, including litigation exposures. Accordingly, results for a given reporting period could be significantly affected if and when we establish reserves for one or more contingencies. Also, our regular reserve reviews may result in adjustments of varying magnitude as additional information regarding claims activity becomes known. Reported results, therefore, may be volatile in certain accounting periods.
