

## Malbek AI

Tailor-made for your contracting operations, Malbek AI seamlessly handles complex CLM use cases properly suited for Generative AI within a secure, multi-LLM stack. Beyond decoding legal language, it empowers you to foresee challenges and gain unparalleled insights, elevating compliance, streamlining processes, and boosting productivity.

Malbek AI isn't just a tool, it's a strategic partner propelling your legal endeavors into the future.

## AI-Powered Contracts

### Minimize risk and ensure compliance

Leverage advanced algorithms to systematically analyze agreements, flag potential compliance issues, and ensure adherence to legal standards.

### Increase efficiency adding resource capacity

Automate repetitive processes, such as document review and data extraction. Do more with Bek, your Legal Copilot to free up valuable human resources and focus on strategic initiatives.

### Transform data into action

Leverage Generative AI insights to negotiate better terms, optimize contract structures, and align legal strategies with broader business objectives.

## Success achieved with Malbek AI

**10x** Efficiency with Bek, the Legal Copilot

**93%** Measurable productivity gains

**70%** Reduction in cycle times

## Features

- **EXTRACTION & ANALYSIS:** In seconds, automatically extract key terms and clauses from legal documents to identify non-standard terms, renewals, milestones, and more.
- **BEK, THE LEGAL COPILOT:** Interact with our advanced AI chatbot, Bek. Collaborate with Bek and communicate your objectives through voice commands or by typing. Get guided, click-free actions to efficiently achieve your goals.
- **CONTEXTUAL GUIDANCE:** Transform complex legal language into clear, understandable text. Generate concise summaries of lengthy legal documents to improve overall business outcomes.
- **THIRD-PARTY PAPER REVIEW:** Simplify third-party document reviews against reference playbooks.
- **CUSTOM TRAINING:** Tailor AI to extract your business or industry specific terms and clauses.
- **PLAYBOOK CREATION & GUARDRAILS:** Ensure compliance with policies and legal standards to quickly identify balanced and non-balanced terms. Upload any document and automatically create playbook guardrails to meet evolving business demands.
- **EFFICIENT SEARCH:** Identify key provisions from your contract repository without any manual data entry or tagging. Eliminate the need for extensive document searches, enabling precise and quick location of any provision in the repository.
- **ADVANCED BUSINESS INTELLIGENCE:** Get contextual insights and actionable recommendations, leveraging contract data to drive strategic business outcomes.
- **PROACTIVE SUPPORT & RISK MANAGEMENT:** Facilitate smooth collaboration during document review and proactively identify legal risks. Receive recommendations to ensure compliance and mitigate potential issues.

Malbek AI allows us to take our contracting process to the next level by providing a visual workflow to users. It is interactive, and the helpful hints make Malbek a fun system for daily work.

— LaToya G.

## Data Security & Privacy

Malbek AI offers advanced functionality in two key ways: through our own Malbek AI Engine and through external, Generative AI engines. Your prompts, results, and data are never used to improve or train LLM models, nor are they shared with other customers or providers.

- Malbek AI harnesses proprietary, multi-layered AI algorithms and models, including our custom Legal BERT Transformer Model, CRF, Word Embeddings, and Latent Semantic Analysis (LSA).
- Our Generative AI services, powered by Large Language Models (LLM), are hosted by industry giants like Microsoft and AWS.
