Subject: Cyberbullying, Rape Threats, and Death Threats by PTI supporters and (presumably) party bots

I, Dr. Alexandra Caldwell (SSN: [REDACTED], resident of [REDACTED], am writing to formally lodge a complaint regarding ongoing cyberbullying and explicit threats of rape and murder directed toward me. I believe that this is an organized campaign by a political party from Pakistan and is characteristic of how they've targeted people online.

I am a reputable researcher focusing on global policy matters. Recently, I published research related to a political party known as PTI (Pakistan Tehreek-e-Insaf). Since the publication of my findings, I have received numerous messages through social media, email, and other online platforms.

These include graphic threats of sexual violence and death—have escalated to the point where I fear for my physical safety and emotional well-being.

Below are the key details of these incidents:

1. Nature of Threats: Rape threats, death threats, and harassing language directly tied to my published research.

2. Platforms Used:

- Social Media (Twitter, Facebook, Instagram)
- Email (via my professional and personal addresses)
- Other messaging services and forums

3. Dates/Timeline: Threats have been incoming since the th of December, growing more frequent in recent days.

4. Evidence:

- Screenshots of threatening messages (attached)
- Email logs, with sender information (attached)
- Links to social media posts directing hate speech or threats at me

Additionally, I want to bring to your attention that the political party in question maintains official registration in the United States under the following entities:

- PTI USA LLC (Registration No. 6160)
- PTI USA LLC (Registration No. 5975)
- I am also attaching a list of office-bearers in the above organizations (obtained from FARA filings), known associates and media personalities of Pakistani origin who are currently based

in the US – they are complicit in that that they continue to encourage and organize hateful and dangerous behaviors by party supporters (and/or bots) on social media.

Given the severity of these threats, I need your intervention and investigation. Explicit threats of sexual violence and death, especially on an organized scale like this is a punishable federal offense under U.S. law. I am reaching out to you to:

1. Identify and prosecute individuals responsible for issuing these threats
2. Put protective measures in place to safeguard me from potential harm
3. Investigate any U.S.-based entities and associates to stop the campaign against me and appropriate legal action
4. Assist in taking down content that explicitly threatens or endangers my life

I am happy to provide any evidence in my possession, including further screenshots, chat logs, and witness statements if necessary.

Enclosures:

- Screenshots of threatening messages
- Printed copies of relevant emails and social media posts

Circulation:
