

Global Vehicle Analytics Market

Market Size, Growth Rate, Opportunities and

Forecast 2022-2030

About Us

Straits Research is a Market research and consulting company that fulfils demand of research agencies, large corporations, and others. We offer several services that are designed mainly for B2B, IT, Healthcare, and CMFE sectors, a major contribution of which is consumer experience research. The Straits Research also offers customized research reports, consulting services, and syndicated research reports.

We offer top-notch research services across the globe and have outstanding track recordin delivering insightful and detailed results to the most challenging briefs. We offer quantitative, hybrid, and qualitative Market research across the globe and our advisors can suggest which would be most appropriate for your project. Our Market research methods are tested and tried, having been enhanced precisely for the b2b space in the industry.

We are glad to be the research partner of several foremost universal brands. We have team of excellent and experienced advisors and analysts who imaginatively tactic every plan in a tailored way to meet our customers specific needs.

Our skilled experts have in-depth knowledge of reports and publishers in their respective sectors. Experts guide you with refine search parameters, review the scope and methodology of the reports you choose, check the availability of full range reports and expert ensures that you are making the correct decision for the preferred purchase.

Table of Contents

1. EXECUTIVE SUMMARY

2. RESEARCH SCOPE & SEGMENTATION

- 2.1 Research Objectives
- 2.2 Market Definition
- 2.3 Limitations & Assumptions
- 2.4 Market Scope & Segmentation
- 2.5 Currency & Pricing Considered

3. MARKET OPPORTUNITY ASSESSMENT

- 3.1 Emerging Regions / Countries
- 3.2 Emerging Companies
- 3.3 Emerging Applications / End Use
- 3.4 Investment Landscape
- 3.5 New Business Models / Revenue Streams
- 3.6 TAM

4. MARKET TRENDS

- 4.1 Drivers
- 4.2 Market Warning Factors
- 4.3 Latest Macro Economic Indicators
- 4.4 Geopolitical Impact

- 4.5 Human Factors
- 4.6 Technology Factors

5. MARKET ASSESSMENT

- 5.1 Porters Five Forces Analysis
- 5.2 Value Chain Analysis
- 5.3 Raw Material Analysis
- 5.4 Sales And Distribution Channel Analysis
- 5.5 Trade Analysis
- 5.6 Average Pricing Analysis
- 5.7 Case Study Analysis
- 5.8 Patent Analysis
- 5.9 M & A Agreements & Collabration Analysis
- 5.10 Export Import Analysis
- 5.11 Cost Structure Analysis

2. RESEARCH SCOPE & SEGMENTATION

2.1 Research Objectives

2.2 Market Definition

This section would define the products/services and all other considerations taken into account while scoping the market report.

2.3 Limitations & Assumptions

This section would mention the limitations of the market research scope and any assumptions considered while compiling the market research.

2.4 Market Scope & Segmentation

- To provide detailed analysis of the market structure for the next 10 years of various segments and sub-segments of the market
- To Provide Insights about factors affecting the market growth
- To analyze the market based on various tool such as supply chain analysis/porters 5 forces /value chain analysis
- To provide historical and forecast revenue of the market segments and sub-segments with respect to region and their respective key countries

- To provide country level analysis of the market with respect to current market size and future prospects
- To provide strategic profiling of key players in the market, comprehensively analyzing their core competency, and drawing a competitive landscape for the market
- To track and analyze competitive developments such as joint ventures, strategic alliances, mergers and acquisitions, product developments, and research and development in the market

Segment	Sub Segment
By Application	 Dealer Performance Analysis Driver and User Behavior Analysis Predictive Maintenance Safety and Security Management Traffic Management Usage-based Insurance
By Deployment	On-premiseCloud
By End-User	 Original Equipment Manufacturers (OEMs) Insurers Automotive Dealers Regulatory Bodies Fleet Owners
By Regions	 North America Europe APAC Middle East and Africa LATAM

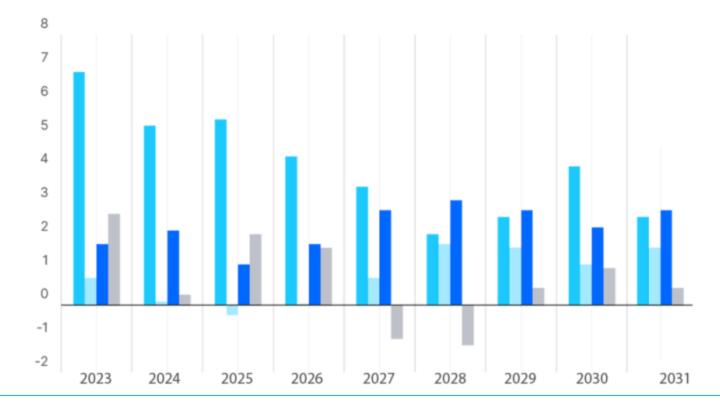

2.5 Currency & Pricing Considered

3. MARKET OPPORTUNITY ASSESSMENT

3.1 Emerging Regions / Countries

This section would cover any potential region/country that could potentially be a major revenue contributor to this market in the near future. An emerging market is the economy of a region/country that is becoming more engaged with markets as it grows. Countries classified as emerging market economies are those with some, but not all, of the characteristics of a developed market. We would include qualitative insights on why the region is touted to be an emerging market.

3.2 Emerging Companies

This section would cover any potential company that is expected to rise in terms of market share and be considered as one of the top players in the near future or during the forecast period. We would compare their products/services, growth strategies, market penetration, pricing etc. to identify their potential impact on the market.

3.3 Emerging Applications / End Use

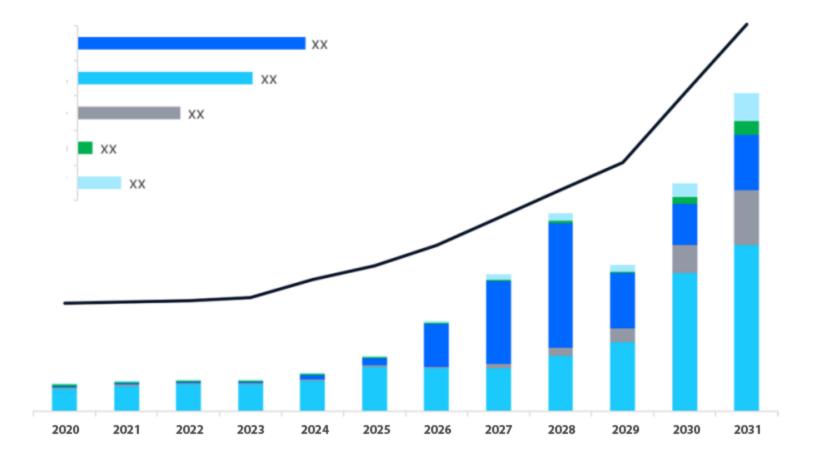

This section would discuss any application/end-use for the product/service that is potentially going to consume a larger market share in the upcoming years, or forecast years. Emerging applications study refers to the process of identifying and analyzing new and innovative uses for a product or technology that are not yet widely adopted or established in a particular market. This type of research helps companies and investors understand the potential for growth and opportunity in a market, as well as any potential challenges or obstacles to adoption.

This would help players understand the potential revenue opportunity and prioritize their strategies in the upcoming years. It's worth noting that the specific emerging applications in a market may vary based on the region and the stage of development of the market.

3.4 Investment Landscape

In this section, we understand how enticing this space if for external investments and venture funding. We learn how the large capital companies and conglomerates view this space and the prospects of larger investments pouring for this market. We mention the previous funding raised by companies in this space and how they are faring, their growth rate etc. This section would be helpful for PE firms, analysts, M&A companies and larger companies looking to understand the space well in order to take a financial investment decision.

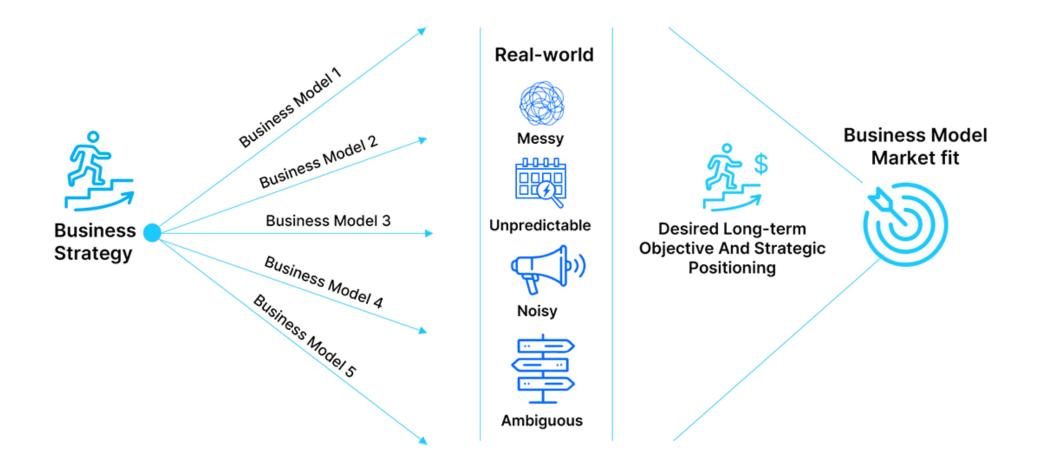

3.5 New Business Models / Revenue Streams

Here we discuss the various revenue streams market participants can evaluate and potentially venture into. We analyze the market potential for horizontal expansions and adding new methods of monetizing the product/service. For certain markets, we identify a potentially new business model opportunity and discuss how existing or new players can navigate into that market. We discuss the potential revenue opportunities from adjacent markets.

3.6 Total Addressable Market (TAM)

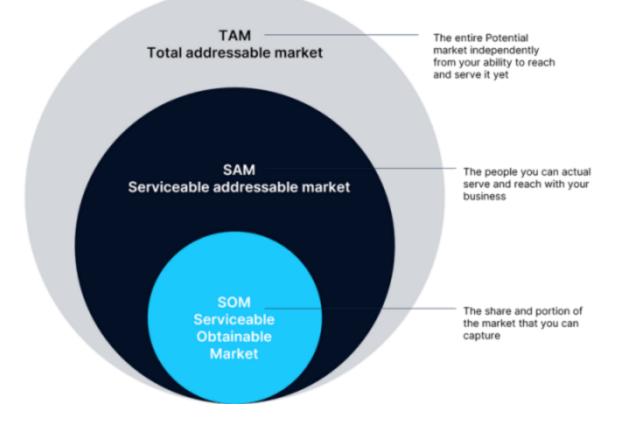

TAM has become an important metric and a more creative process of calculating it has emerged due to the increased speed in which new markets are evolving. The realization is shortening technological improvement cycles and adding (exciting) uncertainty about the rapid coalescence of markets. For that, a deep understanding about TAM allows entrepreneurs to be aware of the blurred lines between their markets.

TAM, SAM and SOM

To evaluate a business opportunity, you need to look into three key metrics:

- TAM or total addressable market
- SAM or serviceable addressable market
- SOM or serviceable obtainable market

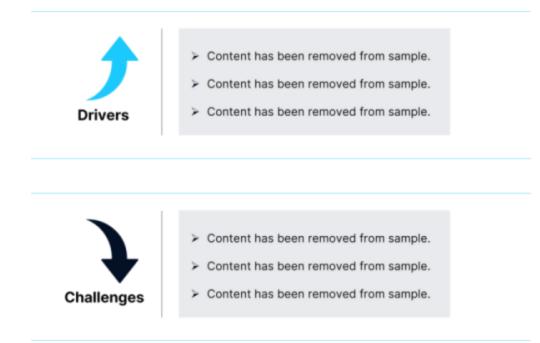

4. MARKET TRENDS

4.1 Drivers

In this section we mention the underlying forces that enable market growth. We discuss various Macro drivers affect large areas of the market at a time, and derive Micro drivers are most often employed from a bottom-up analysis. We elaborate on various factors that are directly or indirectly affecting the YOY growth. We define the driving factors and the coercive components which will cause a surge in the market dynamics in the short or medium term view. The long term drivers are covered by combining the overall regional/country level macro factors combined with product/service long term market sustenance.

4.2 Market Warning Factors

We discuss about the factors restricting continuous market growth. These factors are determined by the various macro and micro level factors affecting the market's potential to truly grow sustainable. We discuss the challenges faced by the industry that can potential disrupt the market development in the short to medium term. Long term assessment is done by considering the factors that can cause a threat to the industry or the product/service, these factors will be elaborated with the studying of demographics regionally, player assessment, and adjacent industry assessment.

4.3 Latest Macro Economic Indicators

Here we discuss Macroeconomic indicators, which are statistics or data readings that reflect the economic circumstances of a particular country, region or market. They are used by our analysts to assess the current and future health of the market. They provide information on the success or failure of the various policies implemented within the market, like fiscal and monetary policies. Macroeconomic indicators are also useful for analysing whether current economic policies are on track to achieve certain market growth rate or not.

4.4 Geopolitical Impact

We discuss the ongoing Geopolitical issues for each regions, it's current and potential impact on the market and related markets. Geopolitical factors can help us by providing insight into the potential risks and opportunities for businesses operating in a particular geographic area. By understanding these factors, we can make informed decisions about where to invest, expand, or withdraw from a market. Overall, understanding geopolitical factors can help companies to make more informed decisions about their market research strategy, and make better decisions about where to focus their efforts in terms of investment, marketing and distribution.

4.5 Human Factors

Here we refer to the social and psychological factors that can impact consumer behavior and decision-making. Human factors can help us by providing insight into the underlying motivations and decision-making processes of consumers. By understanding these factors, companies can better target their marketing and advertising efforts to appeal to specific consumer segments, and develop products and services that better meet the needs of their target market.

4.6 Technology Factors

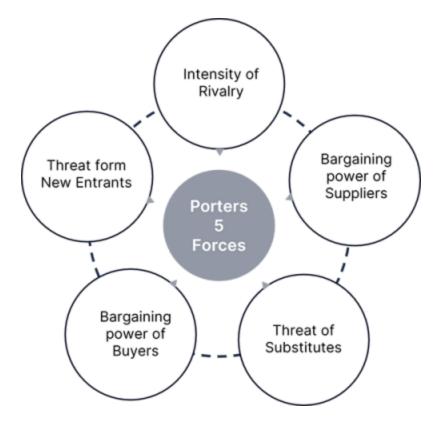

In this section the various technology factors affecting the market, in terms of new advancements, new product alternatives, better technology, better end use application etc. Technology factors are important to understand because they can greatly impact the way in which data is collected, analyzed, and reported. For example, advancements in mobile technology have made it possible for researchers to conduct surveys and gather data through smartphones, which can increase the speed and efficiency of data collection.

5. MARKET ASSESSMENT

5.1 Porters Five Forces Analysis

Porter's Five Forces Analysis is a framework developed by Michael Porter that helps to analyze the competitive forces within an industry. It can be used in market research to evaluate the attractiveness of a market and identify potential opportunities for growth. The five forces that Porter identifies are:

5.1.1 Threat of new entrants:

This refers to the ease with which new competitors can enter the market and the barriers to entry they may face.

5.1.2 Threat of substitute products or services:

This refers to the extent to which other products or services can be used instead of the ones offered by existing firms in the market.

5.1.3 Bargaining power of suppliers:

This refers to the extent to which suppliers can influence the price and availability of the inputs required to produce the product or service.

5.1.4 Bargaining power of buyers:

This refers to the extent to which buyers can influence the price and quality of the product or service.

5.1.5 Rivalry among existing firms:

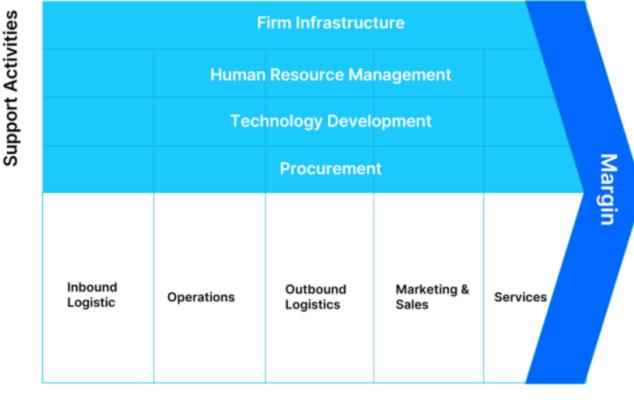

This refers to the intensity of competition among existing firms in the market.

By analyzing each of these forces, market researchers can gain a better understanding of the competitive landscape and identify areas where their company may have a competitive advantage. Additionally, it can help to identify potential risks and challenges, and to develop strategies to mitigate them. This can help companies to make better business decisions and improve their performance in the market.

5.2 Value Chain Analysis

In this section we discuss the value chain analysis of the product/service. Value chain analysis helps to identify and analyze the activities that a company performs in order to create and deliver value to its customers. By analyzing each of these activities, we can gain a better understanding of the company's cost structure, identify areas where cost savings can be made, and identify opportunities to improve the company's operations and increase efficiency. Additionally, it can help to identify the activities that create the most value for the customer, and to develop strategies to improve these activities. This can help companies to make better business decisions and improve their performance in the market.

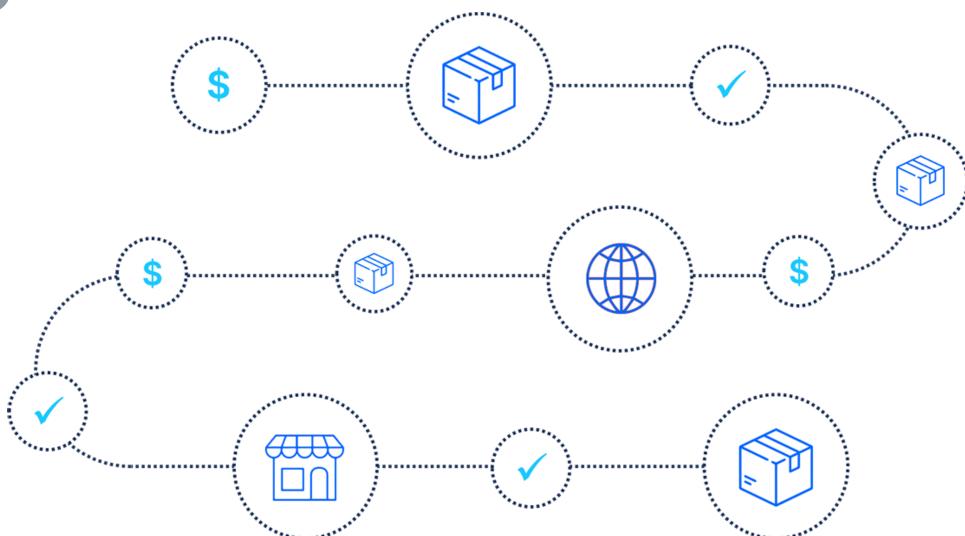

5.3 Raw Material Analysis

Here we study the entire raw material side of the product/service for applicable markets. Raw material analysis is a process used to evaluate the materials and components that are used to produce a product or service. It can be used to understand the cost structure of a product or service, identify opportunities for cost savings, and evaluate the impact of raw materials on the quality and performance of a product or service. Raw material analysis can also help to identify the trends, demand and supply patterns and the potential impact of price fluctuation of raw materials on the production cost and overall market scenario. It also helps to identify the potential risks associated with raw materials and plan accordingly.

5.4 Sales And Distribution Channel Analysis

Sales and distribution channel analysis is a process used to evaluate the various channels through which a company sells and distributes its products or services. It can be used to understand the company's sales and distribution strategy, identify opportunities for growth, and evaluate the effectiveness of different channels. By analyzing these factors, we can gain a better understanding of the top players' sales and distribution strategy, identify opportunities for growth, and evaluate the effectiveness of different channels. By analyzing these factors, we can gain a better understanding of the top players' sales and distribution strategy, identify opportunities for growth, and evaluate the effectiveness of different channels. This can help companies to make better business decisions and improve relevant performance in the market.

Additionally, Sales and distribution channel analysis can help to identify the most profitable and successful channels, which can be utilized for future growth. It also helps to identify the potential risks and challenges associated with different channels and plan accordingly.

5.5 Trade Analysis

Trade analysis is a process used to evaluate the various aspects of the market's trade activities. It can be used to understand the overall trade strategy utilized by the top players, identify opportunities for growth, and evaluate the effectiveness of different trade activities. This can help companies to make better business decisions and improve their performance in the market. Additionally, trade analysis can help to identify the potential risks and challenges associated with different trade activities, such as tariffs and trade agreements. Trade analysis can also provide insights into the competitiveness of a company in the market and the potential opportunities for growth in different regions or countries. It can also help to identify the potential impact of changes in trade policies and regulations on the company's trade activities.

5.6 Average Pricing Analysis

Average price analysis is a process used to evaluate the average price of a product or service in a specific market or industry. It can be to understand the pricing strategies of competitors, identify opportunities for price adjustments, and evaluate the effectiveness of a company's own pricing strategy. By analyzing these factors, we can gain a better understanding of the pricing strategies of competitors, identify opportunities for product or service in a specific market.

Average price analysis can also help to identify the potential impact of changes in cost structures, target market, taxes, tariffs, and other factors on the pricing strategy. It can also provide insights into the potential impact of price changes on the company's sales and profitability. Additionally, it can help to identify the pricing trends and patterns in the market, which can be utilized for future pricing strategies.

5.7 Case Study Analysis

Case study analysis is a process used to evaluate a specific company, product, or industry through in-depth examination of a particular case or situation. It can be used to gain a deeper understanding of a particular company, product, or industry and identify opportunities for growth and improvement. Case study analysis can also help to identify the best practices and strategies that have been successful in the past, and to develop new strategies and approaches. Additionally, it can be used to identify the potential risks and challenges associated with a particular company, product, or industry and plan accordingly. Case studies can also provide insights into the customers' behavior, purchasing patterns, and preferences which can be useful for future market research.

5.8 Patent Analysis

This section is relevant to patents across the market. Patent analysis is a process used to evaluate the patent landscape of a specific industry or technology. It can be used in to understand the competitive landscape, identify opportunities for growth, and evaluate the effectiveness of a company's own patent strategy. By analyzing these factors, market researchers can gain a better understanding of the competitive landscape, identify opportunities for growth, and evaluate the effectiveness of a company's own patent strategy. This can help companies to make better business decisions and improve their performance in the market.

Additionally, Patent analysis can help to identify the potential risks and challenges associated with different patents and plan accordingly. It also can provide insights into the technological advancements and trends in a specific industry or technology, which can be utilized for future research and development. It can also help to identify potential patent infringement issues, and develop strategies to avoid or mitigate them.

5.9 M & A Agreements & Collabration Analysis

Mergers and acquisitions (M&A), agreements and collaboration analysis is a process used to evaluate the various strategic partnerships and transactions that take place within an industry or market. It can be used in market research to understand the competitive landscape, identify opportunities for growth, and evaluate the effectiveness of a company's own M&A, agreements and collaboration strategy.

By analyzing these factors, we can gain a better understanding of the competitive landscape, identify opportunities for growth, and evaluate the effectiveness of a company's own M&A, agreements and collaboration strategy. This can help companies to make better business decisions and improve their performance in the market.

M&A, agreements and collaboration analysis can also help to identify the potential risks and challenges associated with different M&A, agreements and collaborations and plan accordingly. It also can provide insights into the latest trends in the industry and the potential impact of these trends on the companies involved. It can also be used to identify potential opportunities for growth and expansion through M&A, agreements and collaborations.

5.10 Export Import Analysis

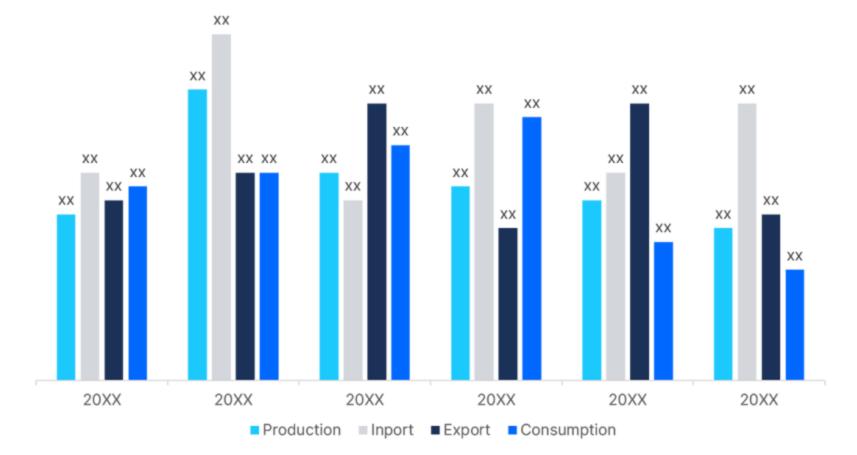

Export-Import (Exim) analysis is a process used to evaluate the volume, value and the trends of a country's import and export activities. It can be used to understand a country's trade patterns, identify opportunities for growth and evaluate the effectiveness of a company's own export and import strategy.

By analyzing these factors, we can gain a better understanding of a country's trade patterns, identify opportunities for growth, and evaluate the effectiveness of a market's own export and import strategy. This can help companies to make better business decisions and improve their performance in the market.

Exim analysis can also help to identify the potential impact of changes in trade policies, tariffs, and regulations on the country's trade activities. It can also provide insights into the competitiveness of a country in the market and the potential opportunities for growth in different regions or countries. Additionally, it can help to identify the potential risks and challenges associated with a country's trade activities and plan accordingly.

	2016	2017	2018	2019	2020	2021	
Production	ХХ	XX	XX	XX	XX	XX	
Import	ХХ	XX	XX	XX	XX	XX	
Export	ХХ	XX	XX	XX	XX	XX	
Consumption	ХХ	XX	XX	XX	XX	XX	

5.11 Cost Structure Analysis

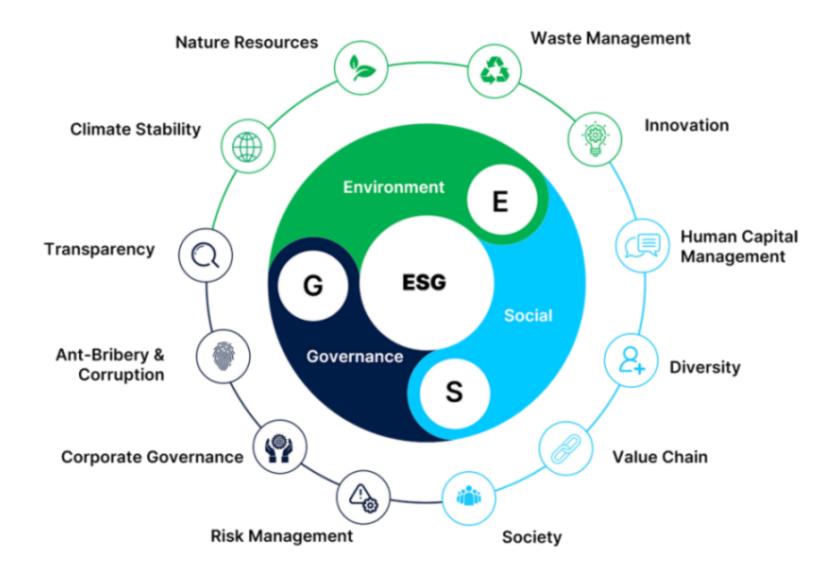

Cost structure analysis is a process used to evaluate the various costs that a market incurs in order to produce and sell its products or services. It can be used to understand a market's cost structure, identify opportunities for cost savings, and evaluate the impact of different costs on the company's overall performance and competitiveness.

By analyzing these factors, we can gain a better understanding of a market's cost structure, identify opportunities for cost savings, and evaluate the impact of different costs on the company's overall performance and competitiveness. This can help companies to make better business decisions and improve their performance in the market.

Cost structure analysis can also help to identify the potential impact of changes in the market or industry on the company's costs and plan accordingly. Additionally, it can help to identify the best practices and strategies that have been successful in reducing costs, and to develop new strategies and approaches for cost management.

6. ESG TRENDS

Vehicle Analytics Market

ESG (Environmental, Social, and Governance) Trends is the process of analyzing and evaluating the impact of a market's average environmental, social, and governance practices on its performance and reputation. It can be used to understand the market's ESG performance, identify opportunities for improvement, and evaluate the impact of ESG factors on the company's overall performance and competitiveness.

When conducting ESG Trends analysis, we typically evaluate factors such as:

- The environmental impact, including its carbon footprint, energy consumption, and waste management practices
- The social impact, including its labor practices, diversity and inclusion policies, and community engagement
- The governance practices, including its transparency, accountability, and ethical behavior
- The ESG performance of competitors compared to the top ESG performers
- The potential impact of ESG factors on the company's reputation and overall performance
- The potential impact of ESG trends on the market and industry

By analyzing these factors, market researchers can gain a better understanding of a company's ESG performance, identify opportunities for improvement, and evaluate the impact of ESG factors on the company's overall performance and competitiveness. This can help companies to make better business decisions, improve their performance in the market, and align with the trend of sustainability.

ESG Trends analysis can also help to identify the potential impact of ESG factors on the market and industry and plan accordingly. Additionally, it can help to identify the best practices and strategies that have been successful in improving ESG performance, and to develop new strategies and approaches for ESG management.

6.1 Environmental

In this section we discuss about the Environmental impact of the industry's output. Environmental analysis in ESG (Environmental, Social, and Governance) refers to the process of evaluating an industry's impact on the environment and its management of environmental risks and opportunities. This can include evaluating an industry's carbon footprint, water usage, waste management practices, and compliance with environmental regulations. The goal of environmental analysis in ESG is to identify and assess the potential risks and opportunities associated with a company's environmental impact and to ensure that the company is operating in a sustainable and responsible manner.

6.2 Social

Social analysis in ESG (Environmental, Social, and Governance) analysis refers to the examination of an industry's impact on society and its stakeholders. This includes factors such as labor practices, human rights, and community relations. The goal of social analysis is to assess the potential risks and opportunities related to a industry's social performance, and to identify areas where the company can improve its impact on society. This analysis can be used by investors, consumers, and other stakeholders to evaluate a company's overall sustainability and ethical behavior.

6.3 Governance

Governance analysis in ESG (Environmental, Social, and Governance) analysis refers to the examination of an industry's internal management and control systems, as well as its external accountability and transparency. This includes factors such as board composition, executive compensation, and shareholder rights. The goal of governance analysis is to assess the potential risks and opportunities related to a company's internal management and external accountability, and to identify areas where the industry can improve its governance practices. This analysis can be used by investors, consumers, and other stakeholders to evaluate a company's overall sustainability and ethical behavior. It can also be used to identify companies that may be at risk of mismanagement or financial fraud.

7. VEHICLE ANALYTICS MARKET SIZE ANALYSIS

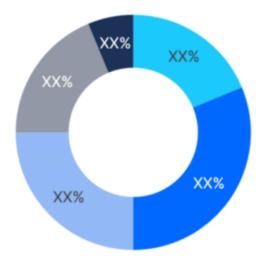

7.1 Vehicle Analytics Market Introduction

In this chapter, we will understand the market size in terms of \$ value and volume (in units, wherever applicable), for all the segments and sub-segments covered.

TABLE GLOBAL VEHICLE ANALYTICS MARKET, REGION SHARE BY VALUE 2018 – 2030 (USD MILLION)

Region	2018	2019	2020	2021	2022	2023	2024	2025	2026	2027	2028	2029	2030	CAGR (2023- 2030)

13.2 Brazil

13.3 Mexico

13.4 Argentina

13.5 Chile

13.6 Colombia

13.7 Rest of LATAM

14. COMPETITIVE ASSESSMENT

14.1 Adoption Matrix

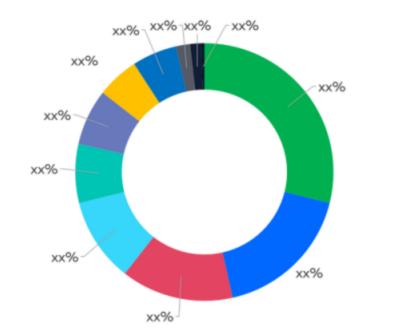

Here we define the adoption matrix, also known as a technology adoption curve or a diffusion of innovation curve, is a parameter used to understand and predict the pattern of adoption of a new product, service, or technology by a specific market or target audience. It is based on the idea that the rate of adoption of a new product or technology follows a predictable pattern, and can be divided into different stages.

By understanding the patterns of adoption within a market, companies can identify the most effective strategies for reaching and influencing different segments of the market, and predict the potential success of a new product or technology. Additionally, it can also be used to identify the potential challenges and barriers that may prevent a new product or technology from being adopted.

14.2 Vehicle Analytics Market Share By Players

In this section we provide the market share analysis by top players.

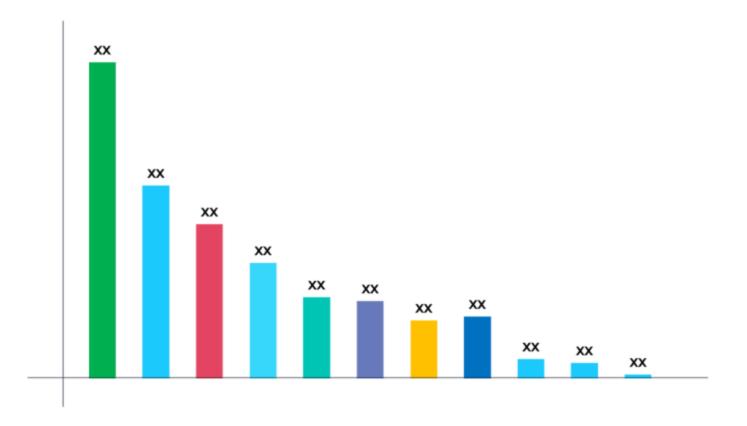

- ARI Fleet Management Company
- Inquiry Limited
- Inseego Corp.
- Continental AG
- Genetec Inc.
- International Business Machines Corporation
- Microsoft Corporation
- Samsung Electronics Co., Ltd
- SAP SE
- Teletrac

14.3 Vehicle Analytics Market Ranking By Revenue For Players

Here we provide ranking as per the revenue generated by the top players

14.4 Average Price By Players

This section covers the average selling price for each of the major players in this market

14.5 Vendor Footprint Analysis

Here we understand the presence and areas of operation for the top players in this market.

16. RESEARCH METHODOLOGY

We implemented a combination of primary and secondary research to estimate and size our market. Secondary research was the initial phase involved in our study. This is where we conducted data mining and referred to verified data sources, such as independent studies, government and regulatory published therapeutic area, technical journals, trade magazines, and paid data sources.

For forecasting, the following parameters were considered:

- Market drivers, challenges and opportunities along with their current and expected impacts
- Technological developments and current status with expected developments
- Consumer trends
- · Unmet need analysis and demand forecasting

Weights were assigned to these parameters and their impact on the market was quantified using a weighted average technique in order to derive expected market growth rate.

All the estimates and forecasts are verified through extensive primary research with experts operating in this market, and include:

- Key Market Participants
- Raw Material Suppliers
- Manufacturers
- Sales and Marketing Team

16.1 Research Data

16.1.1 Secondary Data

16.1.1.1 Major Secondary Sources

16.1.1.2 Key Data From Secondary Sources

16.1.2 Primary Data

16.1.2.1 Key Data From Primary Sources

16.1.2.2 Breakdown Of Primaries

16.1.3 Secondary And Primary Research

16.1.3.1 Key Industry Insights

16.2 Market Size Estimation

16.2.1 Bottom-Up Approach

16.2.2 Top-Down Approach

16.2.3 Market Projection

16.3 Research Assumptions

16.3.1 Assumptions

• The report provides market size with 2021 as the base year in consideration and a yearly forecast till 2030 in terms of Revenue (USD Million). The estimates for all segments including product, services, technology, application, end user and region have been provided on a regional basis for the forecast period mentioned above.

• We have implemented a mix of top-down and bottom-up approach for market sizing, analyzing the key regional markets, dynamics, and trends for various product, services, technology, application, end user and region. The market has been estimated by integrating the regional markets.

• Market estimates have mainly been based on the feedback obtained through primary interviews with key industry participants Inflation has not been accounted for in order to estimate the market

• Totals have been rounded off
