

Empirical data from testing is used to create CyberRatings.org Security Value Map™ (SVM). The SVM illustrates the relative value of security investment options by mapping the Security Effectiveness and the Total Cost per Protected Mbps (Value) of tested products.

Enterprise Firewall	Rating	Security Effectiveness	Rated Throughput (Mbps)	MSRP + 24/7 Support & Maintenance
Check Point	Recommended	98.14%	5,438	\$149,970
Cisco	Caution	19.50%	1,537	\$81,482
Forcepoint	Recommended	99.48%	4,235	\$32,915
Fortinet	Recommended	99.88%	11,383	\$40,532
Juniper Networks	Recommended	99.94%	7,572	\$263,105
Palo Alto Networks	Neutral	79.15%	1,717	\$50,200
Sangfor Technologies	Recommended	94.05%	5,782	\$14,920
Versa Networks	Recommended	99.48%	12,160	\$30,851
