Sustainability in Retail and CPG Market Size & Trends

According to a new market research report published by Global Market Estimates, the [global sustainability in retail and CPG market](#) is projected to grow at a CAGR of 9.1% from 2024 to 2029.

The growth of the global sustainability in retail and CPG market is driven by the increasing consumer awareness and demand for eco-friendly products, regulatory initiatives promoting sustainable practices, and the potential for cost savings.

Key Market Trends

- Companies are increasingly adopting renewable energy sources to power their operations, aiming to minimize carbon footprints. This trend aligns with environmental goals, showcasing a commitment to clean energy and contributing to the overall sustainability objectives of the retail and consumer packaged goods sectors
- Brands are extending their impact by addressing social and environmental issues beyond business operations. This includes philanthropy, community involvement, and initiatives that contribute positively to society, showcasing a commitment to broader sustainability goals
- There is a notable rise in the adoption of sustainable and biodegradable packaging materials. This shift aims to minimize the environmental impact of packaging, meeting consumer demand for eco-friendly options and aligning with broader sustainability objectives in the retail and consumer packaged goods sectors
