

# Opturo Announces U.S. Patent for its Application Building Technology

Sarasota, Florida – August 23, 2023 – Opturo, a leading provider of investment analytics and data management solutions, announced the issuance of [U.S. Patent No. 11,681,504](#), for the **code-free Application Building** product within its Investment Analytics & Data Management Platform.

The patent covers the [Software at Your Service](#) (SAYS™) Platform technology that provides users with a unique and innovative framework to build enterprise-level custom applications quickly and easily. SAYS uses a single textual configuration file to define the application's Data Store, Middle/Business Intelligence, Interface/UI, and Report Layers. In addition to its proprietary customizable data store with a robust data extraction and validation functionality for seamless upload, it provides interfaces to the most commonly used sources such as Text, Excel, PDF, Relational Databases, and Web Services.

“We are excited to receive this patent for our SAYS Platform,” said Kenneth D’Silva, President of Opturo. “This technology is revolutionary in the investment analytics and data management space. It gives our clients the flexibility to design, customize, and rapidly deploy systems and processes without relying on expensive IT resources. Opturo’s state-of-the-art Investment Analytics Platform with an integrated Application Building capability is an industry first.”

## About Opturo
