

## Cities With the Most Aggressive Holiday Drivers in 2020 According to GasBuddy's Drives Data

**Methodology:** The findings were compiled using data from GasBuddy's optional, opt-in [Drives Feature](#) in the GasBuddy app that offers drivers an assessment of their driving habits during their trip in an effort to improve fuel efficiency, mapping out where a poor driving habit occurred.

GasBuddy examined Drives in the top 50 metropolitan areas by population as defined by the United States Census Bureau from Nov. 25 - 29, 2020, noting the fuel efficiency score of each drive, whether it was "POOR", "GOOD", or "GREAT". The percentage of "POOR" drives delineates the drives with the highest number of aggressive driving incidents, including speeding, fast acceleration and hard braking.
