### **First quarter**

#### **Net sales**

Net sales were USD 12.7 billion (+10%, +4% cc) in the first quarter, as volume growth of 9 percentage points (cc), including growth from *Cosentyx* and *Entresto*, was partly offset by the negative impacts of pricing (-3 percentage points) and generic competition (-2 percentage points).

#### **Corporate income and expense, net**

Corporate income and expense, which includes the cost of Group management and central services, amounted to a net expense of USD 187 million compared to USD 99 million in prior year mainly due to lower net gains from the Novartis Venture Fund, lower revenue from retained Vaccines intellectual property rights and higher restructuring costs.

#### **Operating income**

Operating income was USD 2.4 billion (+27%, +17% cc) mainly driven by higher sales and lower net impairment charges partly offset by higher growth investments. Operating income margin in constant currencies increased 2.2 percentage points; currency had a positive impact of 0.4 percentage points, resulting in a net increase of 2.6 percentage points to 19.3% of net sales.

Core operating income was USD 3.3 billion (+11%, +4% cc) as higher sales more than offset growth investments and *Gleevec/Glivec* generic erosion. Core operating income margin in constant currencies decreased 0.1 percentage points; currency had a positive impact of 0.3 percentage points, resulting in a net increase of 0.2 percentage points to 26.3% of net sales.

<sup>1</sup> Constant currencies (cc), core results and free cash flow are non-IFRS measures. An explanation of non-IFRS measures can be found on page 43. Unless otherwise noted, all growth rates in this document refer to same period in prior year.

### **Income from associated companies**

Income from associated companies decreased from USD 215 million in the prior year to USD 152 million. The share of income from Roche Holding AG decreased from USD 71 million to USD 25 million. The higher estimated first quarter income for Roche Holding AG of USD 150 million compared to USD 138 million in the prior year, was more than offset by the recognition of a negative prior year true up of USD 125 million in the first quarter of 2018, compared to a negative prior year true up of USD 67 million recognized in the first quarter of 2017. The share of income from GSK Consumer Healthcare Holdings decreased to USD 128 million in the first quarter of 2018 from USD 143 million in the prior year. The estimated income from GSK Consumer Healthcare Holdings in the first quarter of 2018 was USD 124 million compared to USD 96 million in 2017. The prior year true up recognized in the first quarter of 2018 was only USD 4 million compared to USD 47 million in 2017.

Core income from associated companies increased to USD 375 million from USD 352 million in the prior year. The core income contribution from Roche Holding AG increased to USD 237 million from USD 207 million in the prior year, mainly due to the higher estimated contribution from core income. The share of core income from GSK Consumer Healthcare Holdings decreased to USD 139 million from USD 144 million in prior year. The first quarter of 2017 was positively impacted by a true up from 2016.

The OTC JV stake is classified as an asset held for sale as of March 31, 2018. As a result, in accordance with IFRS, no income from associated companies will be recorded from the OTC JV from April 1, 2018 up to the closure of the divestment. Upon closure of the OTC JV divestiture, which is expected in the second quarter of 2018, Novartis expects to record a substantial one-time net income gain.

### **Interest expense and other financial income/expense**

Interest expense increased to USD 224 million from USD 180 million in prior year due to higher outstanding debt.

Other financial income and expense amounted to an income of USD 34 million compared to an expense of USD 10 million in prior year, mainly due to higher interest income of USD 56 million compared to USD 16 million in prior year.

### **Taxes**

The tax rate increased to 15.8% compared to 14.5% in prior year. The increase was mainly a result of a change in profit mix to jurisdictions with higher tax rates. The core tax rate was 15.4% compared to 15.2% in the prior year period.

### **Net income and EPS**

Net income was USD 2.0 billion (+22%, +12% cc), driven by the strong operating income partly offset by lower income from associated companies.

EPS was USD 0.87 (+24%, +14% cc), driven by growth in net income and the lower number of shares outstanding.

Core net income was USD 3.0 billion (+11%, +4% cc), driven by growth in core operating income.

Core EPS was USD 1.28 (+13%, +6% cc), driven by growth in core net income and the lower number of shares outstanding.

Free cash flow amounted to USD 1.9 billion (+15% USD) compared to USD 1.7 billion in the prior year, mainly driven by higher cash flows from operating activities, partly offset by higher investments in intangible assets.

## Innovative Medicines

	Q1 2018	Q1 2017	% change	
	USD m	USD m	USD	cc
<b>Net sales</b>	<b>8 398</b>	<b>7 518</b>	<b>12</b>	<b>6</b>
<b>Operating income</b>	<b>2 135</b>	<b>1 680</b>	<b>27</b>	<b>18</b>
As % of net sales	25.4	22.3		
<b>Core operating income</b>	<b>2 631</b>	<b>2 355</b>	<b>12</b>	<b>4</b>
As % of net sales	31.3	31.3		

Following the product transfers announced on October 24, 2017 and January 24, 2018, results from the Innovative Medicines Division in 2018 and 2017 exclude the Ophthalmic OTC products and a small portfolio of surgical diagnostic products, transferred to the Alcon Division effective January 1, 2018.

### First quarter

#### **Net Sales**

Net sales were USD 8.4 billion (+12%, +6% cc) in the first quarter. Volume contributed 11 percentage points to sales growth, the highest quarterly volume growth in last two years. Generic competition had a negative impact of 3 percentage points largely due to *Gleevec/Glivec* in the US and Europe and some Ophthalmology products. Pricing had a negative impact of 2 percentage points.

Regionally, US sales (USD 2.7 billion, +7% cc) delivered a strong performance as *Cosentyx*, *Entresto*, *Gilenya*, *Promacta/Revolade* and *Afinitor* more than offset generic erosion. Europe sales (USD 3.1 billion, +5% cc) benefited from continued strong performance of *Cosentyx*, *Entresto*, *Jakavi*, *Tafinlar* + *Mekinist* and *Ilaris*, partly offset by *Gleevec/Glivec* erosion. Japan sales (USD 0.6 billion, -6% cc) declined largely due to generic competition and stock in trade movements prior to the biennial price cut. Emerging Growth Markets sales increased 9% (cc) to USD 2.2 billion, mainly led by double digit growth in China.

Novartis Pharmaceuticals BU sales were USD 5.2 billion (+5% cc). Immunology, Hepatology & Dermatology (USD 706 million, +37% cc) sales increased as *Cosentyx* (USD 580 million, +35% cc) grew strongly across all indications and *Ilaris* (USD 126 million, +47% cc) exhibited double digit growth. In Cardio-Metabolic, *Entresto* (USD 200 million, +126% cc) continued to deliver strong performance driven by increased adoption by physicians both in the US and rest of the world. In Neuroscience, *Gilenya* (USD 821 million, +8% cc) grew driven by stock in trade movements in the US and demand in Europe. Respiratory (USD 433 million, +7% cc) performance was driven by continued double-digit growth of *Xolair* (USD 255 million, +14% cc). Ophthalmology sales (USD 1.2 billion, -5% cc) decreased due to generic erosion in the US, partly offset by continued strong growth of *Lucentis* (USD 520 million, +7% cc).

Novartis Oncology BU sales increased by 6% (cc) to USD 3.2 billion. Growth was mainly driven by *Promacta/Revolade* (USD 257 million, +41% cc), *Tafinlar* + *Mekinist* (USD 267 million, +33% cc), *Jakavi* (USD 234 million, +30% cc), *Kisqali* (USD 44 million), and *Tasigna* (USD 466 million, +8% cc), partly offset by *Gleevec/Glivec* erosion (USD 392 million, -32% cc).

#### **Operating income**

Operating income was USD 2.1 billion (+27%, +18% cc), mainly driven by higher sales and lower net impairment charges mainly related to the prior year discontinuation of RLX030 development, partly offset by generic erosion and growth investments mainly for *Cosentyx* and *Kisqali* as well as for China field force expansion. Operating income margin in constant currencies increased by 2.7 percentage points; currency had a positive impact of 0.4 percentage points, resulting in a net increase of 3.1 percentage points to 25.4% of net sales.

Core adjustments were USD 496 million, including USD 516 million for amortization of intangible assets. Prior-year core adjustments were USD 675 million. Core adjustments decreased compared to prior year mainly due to lower net impairment charges partly offset by lower divestments gains. Core operating income was USD 2.6 billion (+12%, +4% cc). Core operating income margin in constant currencies decreased by 0.3 percentage points; currency had a positive impact of 0.3 percentage points, resulting in a margin of 31.3% of net sales, in line with prior year.

Core gross margin as a percentage of net sales decreased by 0.2 percentage points (cc). Core R&D expenses decreased by 0.5 percentage points (cc). Core SG&A expenses were in line with prior year. Core Other Income and Expense, net decreased the margin by 0.6 percentage points (cc).

### **Innovative Medicines product review**

All comments below focus on first quarter movements in constant currencies. More information on the products can be found in our annual report.

<sup>1</sup>Majority of sales for *Mekinist* and *Tafinlar* are combination, but both can be used as a monotherapy  
nm = not meaningful

***Tasigna*** (USD 466 million, +8% cc) grew strongly in most regions.

***Sandostatin*** (USD 400 million, 0% cc) was in line with prior year, as competitive pressure was partially offset by Emerging Growth Markets.

***Gleevec/Glivec*** (USD 392 million, -32% cc) continued to decline due to generic imatinib competition in most major markets.

***Afinitor/Votubia*** (USD 375 million, +5% cc) growth was supported by the neuroendocrine tumor (NET) and tuberous sclerosis complex (TSC) indications, partly offset by competitive pressure in the breast cancer and renal cell carcinoma indications.

***Tafinlar + Mekinist*** (USD 267 million, +33% cc) continued strong double-digit growth across all regions due to increased demand.

***Exjade/Jadenu*** (USD 261 million, +1% cc) was broadly in line with prior year, a continued uptake of the Film-Coated Tablet formulation in Region Europe was partly offset by Emerging Growth Markets.

***Promacta/Revolade*** (USD 257 million, +41% cc) grew at a strong double-digit rate across all regions due to increased demand and continued uptake of the thrombopoietin class for chronic immune thrombocytopenia.

***Jakavi*** (USD 234 million, +30% cc) showed continued double-digit growth across all regions driven by the myelofibrosis indication and reimbursement of the second-line polycythemia vera indication in additional countries.

***Votrient*** (USD 214 million, +14% cc) grew double-digit, driven mainly by the US and Emerging Growth and Latin American Markets.

***Kisqali*** (USD 44 million) continues to progress with growth in the US and launches in the EU. Additional markets in the EU are expected to gain reimbursement over the next 12 months and filings are underway with other health authorities worldwide.

***Kymriah*** (USD 12 million) commercial launch in the US continues to progress well, in the indication for the treatment of patients up to 25 years of age with B-cell precursor acute lymphoblastic leukemia (ALL) that is refractory or in second or later relapse. Following approval, payers have developed coverage policies for *Kymriah* and a majority of lives are now covered. *Kymriah* is an innovative

immunocellular therapy that is a one-time treatment manufactured individually for each patient using the patient's own T cells.

**Lutathera** (USAN: lutetium Lu 177 dotatate / INN: lutetium (177Lu) oxodotreotide) launched in the US during Q1 and several treatment centers are already operational. **Lutathera** is a targeted therapy for treatment of patients with somatostatin receptor positive gastroenteropancreatic neuroendocrine tumors, using radioactive particles to destroy tumor cells from within. **Netspot** (gallium (Ga 68) dotatate) and **SomaKit TOC** (gallium (Ga 68) edotreotide), complementary diagnostic drugs for localization of somatostatin receptor positive NETs using Positron Emission Tomography (PET), continued to grow.

## **PHARMACEUTICAL BUSINESS UNIT**

### **OPHTHALMOLOGY**

	Q1 2018	Q1 2017	% change	
	USD m	USD m	USD	cc
<i>Lucentis</i>	520	445	17	7
Travoprost Group	124	148	-16	-20
Topical Olopatadine Group	96	100	-4	-7
Other	417	454	-8	-12
<b>Total Ophthalmology</b>	<b>1 157</b>	<b>1 147</b>	<b>1</b>	<b>-5</b>

**Lucentis** (USD 520 million, +7%) sales continued to grow strongly driven by volume growth in Emerging Growth Markets and Europe.

**Travoprost Group** (USD 124 million, -20%) sales declined mainly due to loss of exclusivity in Europe and negative net price impact in the US.

**Topical Olopatadine Group** (USD 96 million, -7%) sales declined mainly due to loss of exclusivity of *Pataday* in the US.

### **NEUROSCIENCE**

	Q1 2018	Q1 2017	% change	
	USD m	USD m	USD	cc
<i>Gilenya</i>	821	722	14	8
Other	20	24	-17	-20
<b>Total Neuroscience</b>	<b>841</b>	<b>746</b>	<b>13</b>	<b>7</b>

**Gilenya** (USD 821 million, +8% cc), with approximately 231,000 patients treated worldwide, grew driven by stock in trade movements in the US and demand in Europe.

### **IMMUNOLOGY, HEPATOLOGY and DERMATOLOGY**

	Q1 2018	Q1 2017	% change	
	USD m	USD m	USD	cc
<i>Cosentyx</i>	580	410	41	35
<i>Ilaris</i>	126	82	54	47
<b>Total Immunology, Hepatology and Dermatology</b>	<b>706</b>	<b>492</b>	<b>43</b>	<b>37</b>

**Cosentyx** (USD 580 million, +35% cc) showed strong volume growth across all indications and most regions. In the US, *Cosentyx* showed strong prescription growth, while net sales in the first quarter were impacted by destocking at the specialty pharmacy level, and rebating for enhanced access to earlier lines of therapy. In January, *Cosentyx* reconfirmed superiority over *Stelara*<sup>®</sup> in PsO in a second head-to-head trial.

**Ilaris** (USD 126 million, +47% cc) growth was driven by continued strong double digit growth across all regions and indications.

## RESPIRATORY

	Q1 2018	Q1 2017	% change	
	USD m	USD m	USD	cc
<i>Ultibro Breezhaler</i>	106	91	16	4
<i>Seebri Breezhaler</i>	38	36	6	-4
<i>Onbrez Breezhaler</i>	27	28	-4	-12
<b>COPD Portfolio</b>	<b>171</b>	<b>155</b>	<b>10</b>	<b>-1</b>
<i>Xolair</i>	255	202	26	14
Other	7	7	0	-9
<b>Total Respiratory</b>	<b>433</b>	<b>364</b>	<b>19</b>	<b>7</b>

**Ultibro Breezhaler** (USD 106 million, +4% cc) a LABA/LAMA, continued to grow, driven by positive FLAME, FLASH, and CLAIM study results as well as the GOLD Global Strategy for the Diagnosis, Management, and Prevention of Chronic Obstructive Pulmonary Disease 2018 Report.

**Seebri Breezhaler** (USD 38 million, -4% cc) an inhaled LAMA, declined, due in part to a focus of resources on *Ultibro Breezhaler*.

**Onbrez Breezhaler** (USD 27 million, -12% cc) an inhaled LABA, declined, due in part to a focus of resources on *Ultibro Breezhaler*.

**Xolair** (USD 255 million, +14% cc) continued to grow in both indications. Growth in Severe Allergic Asthma was driven by Europe and Emerging Growth Markets, including the launch in China. Growth in Chronic Spontaneous Urticaria (CSU) was driven by increasing disease awareness. CSU, being a severe skin disease, is managed by the Immunology, Hepatology and Dermatology franchise.

## CARDIO-METABOLIC

	Q1 2018	Q1 2017	% change	
	USD m	USD m	USD	cc
<i>Entresto</i>	200	84	138	126
Other	4	4	0	23
<b>Total Cardio-Metabolic</b>	<b>204</b>	<b>88</b>	<b>132</b>	<b>122</b>

**Entresto** (USD 200 million, +126% cc) continued to deliver strong performance driven by increased adoption by physicians both in the US and rest of the world. About 575,000 heart failure patients with reduced ejection fraction benefit from *Entresto*, now approved in more than 100 countries. In the first quarter, prescriptions for *Entresto* in the US more than doubled versus a year ago. A growing body of clinical and real-world evidence, including a new post-hoc analysis published in JAMA Cardiology in April 2018, shows how *Entresto* helps patients with HFrEF not only live longer and stay out of the hospital, but also have improved quality of life. *Entresto* has been launched in almost 60 countries, including most major markets.

## ESTABLISHED MEDICINES

	Q1 2018	Q1 2017	% change	
	USD m	USD m	USD	cc
<i>Galvus Group</i>	318	286	11	5
<i>Diovan Group</i>	265	242	10	3
<i>Exforge Group</i>	248	228	9	1
<i>Neoral/Sandimmun(e)</i>	115	115	0	-6
<i>Voltaren/Cataflam</i>	115	119	-3	-8
<i>Zortress/Certican</i>	109	91	20	13
Other	696	744	-6	-11
<b>Total Established Medicines</b>	<b>1 866</b>	<b>1 825</b>	<b>2</b>	<b>-3</b>

**Galvus Group** (USD 318 million, +5% cc) continues to grow driven by solid performance in Emerging Growth Markets including China.

**Diovan Group** (USD 265 million, +3% cc) showed growth driven by Emerging Growth Markets, partly offset by decline in the rest of the world due to loss of exclusivity.

**Exforge Group** (USD 248 million, +1% cc) was broadly in line with prior year as sales growth in Emerging Growth Markets was partly offset by generic competition.

**Neoral/Sandimmun(e)** (USD 115 million, -6% cc) declined due to generic competition and mandatory price reductions, mainly in Japan and Europe.

**Voltaren/Cataflam** (USD 115 million, -8% cc) declined due to generic competition.

**Zortress/Certican** (USD 109 million, +13% cc) continued to show growth across all regions.

## Sandoz

	Q1 2018	Q1 2017	% change	
	USD m	USD m	USD	cc
<b>Net sales</b>	<b>2 517</b>	<b>2 430</b>	<b>4</b>	<b>-4</b>
<b>Operating income</b>	<b>409</b>	<b>343</b>	<b>19</b>	<b>8</b>
As % of net sales	16.2	14.1		
<b>Core operating income</b>	<b>499</b>	<b>460</b>	<b>8</b>	<b>1</b>
As % of net sales	19.8	18.9		

## First quarter

### **Net sales**

Sandoz net sales were USD 2.5 billion (+4%, -4% cc) in the first quarter, as 6 percentage points of price erosion, mainly in the US, was partly offset by volume growth of 2 percentage points. Excluding the US, net sales grew by 5% (cc).

Sales in the US were USD 708 million (-18% cc), mainly due to continued competitive pressure. Sales in Europe were USD 1.3 billion (+7% cc), driven by Germany, the UK and France across both, biosimilars and retail. Sales in Asia / Africa / Australasia were USD 323 million (-4% cc), driven by portfolio optimization in South Korea and sales phasing in Japan due to bi-annual government price cuts. Sales in Latin America were USD 102 million (+4% cc).

Global sales of Biopharmaceuticals (biosimilars, biopharmaceutical contract manufacturing and *Glatopa*) grew 13% (cc) to USD 335 million. By region, Europe continued double-digit growth supported by last year's launches of biosimilar *Rixathon* (rituximab) and *Erelzi* (etanercept). US Biopharmaceuticals declined primarily due to competitive pressures on *Glatopa* 20mg. *Glatopa* 40mg launch started in the first quarter; building of inventory to support the launch.

Retail sales were USD 2.0 billion (-6% cc), driven primarily by the decline in the US (-21% cc). Total Anti-Infectives franchise sales were USD 370 million (-4% cc), impacted by US pricing. The decline in Anti-Infectives finished dosage forms sold under the Sandoz name (USD 230 million, -7% cc) was partly offset by growth in Anti-Infectives sold to third parties for sale under their own name (USD 140 million +9% cc).

### **Operating income**

Operating income was USD 409 million (+19%, +8% cc) mainly driven by continued gross margin improvement and gains from the divestment of non-strategic assets partly offset by higher growth investments in ex-US markets. Operating income margin in constant currencies increased by 1.8 percentage points; currency had a positive impact of 0.3 percentage points; resulting in a net increase of 2.1 percentage points to 16.2% of net sales.

Core adjustments amounted to USD 90 million, including USD 97 million of amortization. Prior year core adjustments were USD 117 million. Core adjustments decreased compared to prior year mainly due to higher gains from the divestment of non-strategic assets, mostly offset by higher restructuring costs and legal provisions. Core operating income was USD 499 million (+8%, +1% cc), mainly driven by continued gross margin improvements offset by lower sales and higher M&S investments in ex-US markets. Core operating income margin increased by 1.0 percentage point; currency had a negative impact of 0.1 percentage points, resulting in net increase of 0.9 percentage points to 19.8% of net sales.

Core gross margin as a percentage of net sales increased by 3.0 percentage points (cc), driven by a favorable product and geographic mix and ongoing productivity improvements, which more than offset the impact of price erosion in the US. Core R&D expenses increased by 0.1 percentage points (cc). Core SG&A expenses increased by 2.7 percentage points (cc), mainly due to higher M&S investments in key ex-US markets. Core Other Income and Expense, had a positive margin contribution of 0.8 percentage points (cc) mainly due to gains from the divestment of small non-strategic assets.

## Alcon

	Q1 2018	Q1 2017	% change	
	USD m	USD m	USD	cc
<b>Net sales</b>	<b>1 779</b>	<b>1 591</b>	<b>12</b>	<b>7</b>
<b>Operating income/loss</b>	<b>90</b>	<b>-2</b>	<b>nm</b>	<b>nm</b>
As % of net sales	5.1	-0.1		
<b>Core operating income</b>	<b>360</b>	<b>258</b>	<b>40</b>	<b>29</b>
As % of net sales	20.2	16.2		

nm = not meaningful

Following the product transfers announced on October 24, 2017 and January 24, 2018, results from the Alcon Division in 2018 and 2017 include the Ophthalmic OTC products and a small portfolio of surgical diagnostic products, transferred from the Innovative Medicines Division effective January 1, 2018.

### First quarter

#### **Net sales**

Alcon net sales were USD 1.8 billion (+12%, +7% cc) in the first quarter, with growth in all product categories. Stock-in-trade movements accounted for approximately 1% (cc) of growth. Surgical grew 8% (cc), driven primarily by implantables, which include intraocular lenses (IOLs) and CyPass Micro Stent and continued consumables growth. Vision Care grew 5% (cc) driven by continued double-digit growth of *Dailies Total1*. Alcon's strong results reflect the benefits from improved operations, customer relationships and product launches.

Sales in the US grew 6% (cc), Europe grew 3% (cc) and Asia / Africa / Australasia grew 12% (cc). Emerging Growth Markets grew 16% (cc).

#### **Operating income**

Operating income was USD 90 million, compared to a loss of USD 2 million in the prior year, largely driven by higher sales. Operating income margin in constant currencies grew 3.9 percentage points; currency had a positive impact of 1.3 percentage points, resulting in a net increase of 5.2 percentage points.

Core adjustments amounted to USD 270 million, compared to USD 260 million in the prior year, increasing slightly mainly due to higher costs related to business development activities. Core operating income was USD 360 million (+40%, +29% cc), primarily driven by higher sales. Core operating income margin in constant currencies increased by 3.4 percentage points; currency had a positive impact of 0.6 percentage points, resulting in a net increase of 4.0 percentage points to 20.2% of net sales.

Core gross margin as a percentage of net sales increased 0.7 percentage points (cc) versus the prior year quarter, including improved production efficiencies. Core R&D expenses decreased by 0.6 percentage points (cc) and core SG&A expenses decreased by 2.1 percentage points (cc) both driven by higher sales. Core Other Income and Expense was in line with prior year.

### Alcon product review

All comments below focus on first quarter movements in constant currencies.

#### **SURGICAL**

	Q1 2018	Q1 2017	% change	
	USD m	USD m	USD	cc
Consumables	541	494	10	5
Implantables	279	234	19	14
Equipment/Other	157	134	17	13
<b>Total Surgical</b>	<b>977</b>	<b>862</b>	<b>13</b>	<b>8</b>

Surgical sales were USD 977 million (+8% cc) in the first quarter, as implantables grew (+14% cc), driven by product launches, including advanced technology IOLs (AT-IOLs) and CyPass Micro Stent, and favorable stock in trade movements. Consumables grew (+5% cc), benefitting from a strong installed equipment base. Equipment grew (+13% cc), primarily driven by higher sales of refractive and vitreoretinal systems.

## VISION CARE

	Q1 2018	Q1 2017	% change	
	USD m	USD m	USD	cc
Contact lenses	509	453	12	6
Ophthalmic OTC	169	158	7	4
Contact lens care	124	118	5	1
<b>Total Vision Care</b>	<b>802</b>	<b>729</b>	<b>10</b>	<b>5</b>

Vision Care sales were USD 802 million (+5% cc) in the first quarter. Contact lenses grew (+6% cc), driven by continued double-digit growth of *Dailies Total1* globally. Contact lens care grew +1% (cc). Ophthalmic OTC grew +4% (cc) driven by favorable stock in trade movements, including new launches.

## **CASH FLOW AND GROUP BALANCE SHEET**

### **Cash flow**

#### **First quarter**

Cash flows from operating activities amounted to USD 2.5 billion, compared to USD 2.0 billion in the prior year. The increase of USD 0.5 billion was mainly driven by higher net income adjusted for non-cash items as well as favorable working capital changes due to the receipt of a sales milestone recognized in the fourth quarter of 2017 related to the Vaccines divestment to GSK.

Cash flows used in investing activities amounted to USD 4.1 billion, compared to USD 1.1 billion in the prior year. The current year period includes the cash outflow of USD 3.5 billion (net of cash acquired USD 0.4 billion) for the acquisition of Advanced Accelerator Applications S.A. The current year period also includes cash outflows for the purchase of property, plant and equipment amounting to USD 0.4 billion and for intangible assets amounting to USD 0.4 billion. These cash outflows were partly offset by USD 0.3 billion cash inflows from the sale of property, plant and equipment, intangible and financial assets including net cash inflows from marketable securities and commodities.

In the prior year, cash flows used in investing activities mainly related to cash outflows for the purchase of property, plant and equipment of USD 0.3 billion, intangible assets of USD 0.2 billion, financial assets and other non-current assets of USD 0.2 billion, and for acquisitions and divestments of businesses, net (including the Ziarco Group Limited and Encore Vision, Inc, acquisitions) of USD 0.7 billion. This was partly offset by cash inflows from the sale of property, plant and equipment, intangible assets and financial assets of USD 0.4 billion.

The cash flows used in financing activities amounted to USD 1.5 billion, compared to USD 0.4 billion in the prior year. The current year period mainly includes the cash outflows for the dividend payment of USD 7.0 billion, and cash inflows from the issuance of a euro bond of USD 2.8 billion (notional amount EUR 2.25 billion), the net increase in current financial debts of USD 2.5 billion, and from net treasury share transactions of USD 0.3 billion.

In the prior year, cash flows used in financing activities included cash outflows for the dividend payment of USD 6.5 billion and for net treasury share transactions of USD 1.1 billion. The net cash inflows from current and non-current financial debts of USD 7.2 billion were mainly from the issuance of bonds denominated in US dollar and euro for a notional amount of USD 3.0 billion and EUR 1.85 billion (USD 2.0 billion) respectively, and the net increase in current financial debts of USD 2.3 billion.

Free cash flow amounted to USD 1.9 billion (+15% USD) compared to USD 1.7 billion in the prior year, mainly driven by higher cash flows from operating activities, partly offset by higher investments in intangible assets.

### **Balance Sheet**

#### **Assets**

Total non-current assets of USD 102.5 billion at March 31, 2018 decreased by USD 2.4 billion compared to December 31, 2017. Property, plant and equipment increased by USD 0.2 billion to USD 16.7 billion, mainly due to the favorable currency translation adjustments, as net additions were more than offset by depreciation. Goodwill increased by USD 2.4 billion to USD 34.1 billion, and intangible assets other than goodwill increased by USD 2.1 billion to USD 32.1 billion both mainly due to the acquisition of Advanced Accelerator Applications S.A. (AAA). Investments in associated companies decreased by USD 7.3 billion to USD 8.1 billion at March 31, 2018, mainly due to the USD 7.5 billion reclassification of the investment in GlaxoSmithKline Consumer Healthcare Holdings Ltd. to current assets - assets held for sale, following the announcement of the divestment to GlaxoSmithKline plc. on March 27, 2018.

Total current assets before assets held for sale of USD 25.6 billion at March 31, 2018 decreased by USD 2.6 billion, compared to December 31, 2017. Cash and cash equivalents of USD 5.8 billion decreased by USD 3.0 billion and other current assets of USD 2.8 billion decreased by USD 0.2 billion. Inventories of USD 7.2 billion increased by USD 0.4 billion and trade receivables of USD 8.9 billion increased by USD 0.3 billion.

**Liabilities**

Total non-current liabilities of USD 36.1 billion at March 31, 2018 increased by USD 0.6 billion compared to December 31, 2017. Long-term financial debts of USD 23.2 billion were in line with December 31, 2017, as the issuance of a euro bond of USD 2.8 billion (notional amount EUR 2.25 billion) was offset by the reclassification of a US dollar bond of USD 3.0 billion due within 12 months to current liabilities. Deferred tax liabilities of USD 5.9 billion increased by USD 0.8 billion, mainly due the acquisition of AAA. Provisions and other non-current liabilities of USD 7.0 billion decreased by USD 0.1 billion.

Total current liabilities of USD 28.2 billion at March 31, 2018 increased by USD 4.8 billion compared to December 31, 2017. Trade payables of USD 5.0 billion decreased slightly by USD 0.2 billion. Current financial debts and derivatives of USD 10.9 billion increased by USD 5.6 billion, due to higher short-term borrowings and the reclassification of the US dollar bond of USD 3.0 billion due within 12 months from non-current liabilities. Provisions and other current liabilities of USD 10.6 billion decreased by USD 0.6 billion. Current income tax liabilities of USD 1.8 billion were in line with December 31, 2017.

**Group equity**

The Group's equity of USD 71.2 billion at March 31, 2018 decreased by USD 3.0 billion compared to USD 74.2 billion at December 31, 2017. The decrease was mainly due to USD 7.0 billion for the dividend payment, partially offset by net income of USD 2.0 billion, favorable currency translation differences of USD 1.0 billion, net actuarial gains of USD 0.2 billion, equity-based compensation of USD 0.2 billion and the net effect of exercise of options and employee transactions of USD 0.3 billion.

**Net debt and debt/equity ratio**

The Group's liquidity amounted to USD 6.4 billion at March 31, 2018 compared to USD 9.5 billion at December 31, 2017, and the total of the non-current and current financial debt, including derivatives, amounted to USD 34.1 billion at March 31, 2018, compared to USD 28.5 billion at December 31, 2017. The net debt increased to USD 27.7 billion at March 31, 2018 compared to USD 19.0 billion at December 31, 2017. The debt/equity ratio increased to 0.48:1 at March 31, 2018 compared to 0.38:1 at December 31, 2017.

## Innovation Review

Benefitting from our continued focus on innovation, Novartis has one of the industry's most competitive pipelines with more than 200 projects in clinical development.

### **Selected Innovative Medicines approvals: US, EU and Japan**

<b>Product</b>	<b>Active ingredient/ Descriptor</b>	<b>Indication</b>	<b>Approval date</b>
<i>Tasigna</i>	nilotinib	Pediatric CML	US – March 2018
<i>Lutathera</i>	lutetium Lu 177 dotatate	gastroenteropancreatic neuroendocrine tumors	US – Jan 2018
<i>Signifor LAR</i>	pasireotide	Cushing's disease	JP – March 2018
<i>Tafinlar + Mekinist</i>	dabrafenib + trametinib	BRAF V600+ non-small cell lung cancer (NSCLC)	JP – March 2018

### **Selected Innovative Medicines projects awaiting regulatory decisions**

<b>Product</b>	<b>Indication</b>	<b>Completed submissions</b>			<b>News update</b>
		<b>US</b>	<b>EU</b>	<b>Japan</b>	
AMG 334	Migraine prophylaxis	Q2 2017	Q2 2017		- Erenumab met primary and all secondary endpoints in unique Phase IIIb LIBERTY study in episodic migraine patients who have failed multiple prior preventive treatments
CTL019 ( <i>Kymriah</i> in US)	Pediatric/young adult acute lymphoblastic leukemia	Approved	Q4 2017	Q4 2017 (tbc)	
	r/r Diffuse Large B-Cell Lymphoma	Q4 2017	Q4 2017		- Priority review granted by FDA – Jan 2018
<i>Gilenya</i> (fingolimod)	Pediatric multiple sclerosis	Q4 2017	Q4 2017		
LTW888 ( <i>Luxturna</i> in US)	biallelic mutations of the RPE65 gene	Approved	Q2 2017		- Agreement signed with Spark Therapeutics to develop, register and commercialize voretigene neparvovec-rzyl outside the US
ACZ885 (canakinumab)	Secondary prevention of cardiovascular events	Q4 2017	Q4 2017

## **Notes to the Condensed Interim Consolidated Financial Statements for the three month period ended March 31, 2018 (unaudited)**

### **1. Basis of preparation**

These Condensed Interim Consolidated Financial Statements for the three month period ended March 31, 2018, were prepared in accordance with International Accounting Standard 34 *Interim Financial Reporting* and accounting policies set out in the 2017 Annual Report published on January 24, 2018, except for the changes to the accounting policies related to Revenues, Marketable securities and non-current financial assets. These accounting policies have changed as of January 1, 2018, due to the adoption of the new IFRS standards IFRS 9 Financial Instruments and IFRS 15 Revenues from Contracts with Customers. The updated accounting policies are disclosed in Note 2 to these condensed interim consolidated financial statements.

### **2. Selected critical accounting policies**

The Group's principal accounting policies are set out in Note 1 to the Consolidated Financial Statements in the Annual Report 2017 and conform with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board. The presentation of financial statements requires management to make subjective and complex judgments that affect the reported amounts. Because of the inherent uncertainties, actual outcomes and results may differ from management's assumptions and estimates.

As discussed in the 2017 Annual Report, goodwill, Alcon brand name and acquired In-Process Research & Development projects are reviewed for impairment at least annually and these, as well as all other investments in intangible assets, are reviewed for impairment whenever an event or decision occurs that raises concern about their balance sheet carrying value. The amount of goodwill and other intangible assets on the Group's consolidated balance sheet has risen significantly in recent years, primarily from acquisitions. Impairment testing under IFRS may lead to potentially significant impairment charges in the future that could have a materially adverse impact on the Group's results of operations and financial condition.

#### **Assets Held for Sale**

Assets are classified as asset held for sale when their carrying amount is to be recovered principally through a sale transaction and a sale is considered highly probable. They are stated at the lower of carrying amount and fair value less cost to sell. Assets held for sale, included within a disposal group or discontinued operations are not depreciated or amortized. For investments in associated companies accounted for under the equity method, the Group discontinues the use of the equity method of accounting starting from the date the investment is classified as asset held for sale up to the associated company's disposal date. Any dividends received during the period the investment is held for sale continue to be recorded as a reduction of the investment carrying amount.

#### **Impact of adopting significant new IFRS standards in 2018**

The following new IFRS standards have been adopted by Novartis from January 1, 2018:

##### **IFRS 9 FINANCIAL INSTRUMENTS**

Novartis implemented IFRS 9 Financial Instruments as of January 1, 2018, which substantially changes the classification and measurement of financial instruments. The new standard requires impairments to be based on a forward-looking model, changes the approach to hedging financial exposures and related documentation, changes the recognition of certain fair value changes and amends disclosures requirements.

The impairment of financial assets, including trade and lease receivables, is now assessed using an expected credit loss model; previously, the incurred loss model was used. Given the nature of Novartis' financial assets, the Group had no significant impact to its provisions for doubtful accounts or impairments from this change.

The new hedge accounting model introduced by the standard requires hedge accounting relationships to be based upon the Group's own risk management strategy and objectives, and to be discontinued only when the relationships no longer qualify for hedge accounting. There was no impact upon adoption of the new standard, as the Groups existing hedge relationships continue to be designated as such under the new hedge accounting requirements.

The most significant impact to the Group, upon adoption of IFRS 9, relates to the treatment of the unrealized gains and losses from changes in fair value on certain of the Group's financial instruments, which were previously classified as available-for-sale marketable securities and financial investments. The unrealized gains and losses (to the extent of previous recognized unrealized gains), which the Group recognized previously in the consolidated statement of other comprehensive income, will from January 1, 2018 be recognized in the consolidated income statement. This approach will be applied to equity securities where the fair value through other comprehensive income irrevocable option will not be applied.

The Group applied the modified retrospective method upon adoption of IFRS 9 on January 1, 2018. This method requires the recognition of the cumulative effect of initially applying IFRS 9 to retained earnings and not to restate prior years. The cumulative effect recorded at January 1, 2018 was an increase to retained earnings of USD 177 million.

## **IFRS 15 REVENUE FROM CONTRACTS WITH CUSTOMERS**

Novartis implemented the new standard IFRS 15 Revenue from Contracts with Customers as of January 1, 2018. The new standard amends revenue recognition requirements and establishes principles for reporting information about the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. The standard replaces IAS 18 Revenue and IAS 11 Construction contracts and related interpretations.

The impacts of adoption of the new standard are summarized below:

- The Group's "Net sales" are derived from the sale of drug substances, vision care products, surgical equipment, other products and services, where control transfers to our customers and our performance obligations are satisfied at the time of shipment to or receipt of the products by the customer or when the services are performed. The adoption of IFRS 15 did not significantly change the timing or amount of revenue recognized under these arrangements.
- The Group's "Other revenue" consists of royalty income from the out-licensing of intellectual property (IP), which is recognized as earned and from manufacturing and other services, where revenue is recognized when control transfers to the third party and our performance obligations are satisfied. The adoption of IFRS 15 did not significantly change the timing or amount of revenue recognized from these manufacturing and other services arrangements, nor did it change accounting for these royalty arrangements, as the standard's royalty exception is applied for IP licenses.

"Other revenue" also includes revenue from profit sharing arrangements with our collaboration partners. Furthermore, the Group receives milestone payments related to the out-licensing of IP. The adoption of IFRS 15 did not significantly change the timing or amount of revenue recognized under these arrangements.

The Group applied the modified retrospective method upon adoption of IFRS 15 on January 1, 2018. This method requires the recognition of the cumulative effect of initially applying IFRS 15 to retained earnings and not to restate prior years. The cumulative effect recorded at January 1, 2018 was an increase to retained earnings of USD 60 million.

For further information on the impact of adoption of IFRS 9 Financial Instruments and IFRS 15 Revenue from Contracts with Customers see Note 7.

The Group's updated accounting policies, effective January 1, 2018, upon adoption of IFRS 9 Financial Instruments and IFRS 15 Revenue from Contracts with Customers are as follows:

### **Marketable securities, commodities and non-current financial assets**

Marketable securities are financial assets consisting principally of equity and debt securities as well as fund investments. Marketable securities held for short-term purposes are principally traded in liquid markets and are classified as marketable securities within current assets on the consolidated balance sheet. The financial impacts related to these financial assets are recorded in "Other financial income and expense" in the consolidated income statement. Marketable securities held for long-term strategic purposes are classified as non-current financial assets on the consolidated balance sheet. The financial impacts related to these financial assets are recorded in "Other income" and "Other expense" in the consolidated income statement.

Marketable securities are initially recorded at fair value on their trade date, which is different from the settlement date when the transaction is ultimately effected. Quoted securities are re-measured at each reporting date to fair value based on current market prices. If the market for a financial asset is not active or no market is available, fair values are established using valuation techniques. The majority of non-quoted investments are valued initially at fair value through the established purchase price between a willing buyer and seller. Non-quoted investments are subsequently adjusted based on values derived from discounted cash flow analysis or other pricing models. These investment values are classified as "Level 3" in the fair value hierarchy.

The Group classifies and accounts for its marketable securities and non-current financial assets in the following categories:

- Debt securities are valued at fair value through other comprehensive income with subsequent recycling through profit and loss, as they meet the "Solely Payment of Principal and Interest" and business model criteria. Unrealized gains, except exchange gains, are recorded as a fair value adjustment in the consolidated statement of comprehensive income. They are recognized in the consolidated income statement when the debt instrument is sold, at which time the gain is transferred to "Other financial income and expense". Exchange gains and losses related to debt instruments are immediately recognized in the consolidated income statement under "Other financial income and expense".
- Fund investments, equity securities of the Novartis Venture Fund and derivative assets are valued at fair value through profit and loss (FVPL). Unrealized gains and losses, including exchange gains and losses, are recognized in the consolidated income statement, for marketable securities held for short-term purposes and derivative assets to "Other financial income and expense", and for all other equity securities and fund investments held for strategic purposes to "Other income" for gains and "Other expense" for losses.
- Equity securities held as strategic investments, typically held outside of the Novartis Venture Fund, are generally designated at date of acquisition as financial assets valued at fair value through other comprehensive income with no subsequent recycling through profit and loss. Unrealized gains and losses, including exchange gains and losses, are recorded as a fair value adjustment in the consolidated statement of comprehensive income. They are reclassified to retained earnings when the equity security is sold. If these equity securities are not designated at date of acquisition as financial assets valued at fair value through other comprehensive income, they are valued at FVPL, as described above.
- Other financial assets, such as loans and long-term receivables from customers, advances and other deposits, are valued at amortized costs, which reflects the time value of money less any allowances for uncollectable amounts.

The Group assesses on a forward-looking basis the expected credit losses associated with its debt securities valued at fair value through other comprehensive income. Impairments on debt securities are recorded in "Other financial income and expense".

For other financial assets valued at amortized costs, impairments, which are based on their expected credit losses, and exchange rate losses are included in "Other expense" in the consolidated income statement and exchange rate gains and interest income, using the effective interest rate method, are included in "Other income" in the consolidated income statement.

Commodities, which include gold bullion or coins, are valued at the lower of cost or fair value using current market prices. The changes in fair value below cost are immediately recorded in “Other financial income and expense”.

## **Trade receivables**

Trade receivables are initially recognized at their invoiced amounts, including any related sales taxes less adjustments for estimated revenue deductions such as rebates, chargebacks and cash discounts.

Provisions for doubtful trade receivables are established using an expected credit loss model (ECL). The provisions are based on a forward-looking ECL, which includes possible default events on the trade receivables over the entire holding period of the trade receivable, considering the occurrence of a significant increase in credit risk. Significant financial difficulties of a customer, such as probability of bankruptcy, financial reorganization, default or delinquency in payments are considered indicators that recovery of the trade receivable is doubtful. These provisions represent the difference between the trade receivable’s carrying amount in the consolidated balance sheet and the estimated net collectible amount. Charges for doubtful trade receivables are recorded as marketing and selling costs recognized in the consolidated income statement within “Selling, General & Administration” expenses.

## **Revenue recognition**

### **Revenue**

Revenue on the sale of Novartis Group products and services, which is recorded as “Net sales” in the consolidated income statement, is recognized when a contractual promise to a customer (performance obligation) has been fulfilled by transferring control over the promised goods and services to the customer, generally at the point in time of shipment to or receipt of the products by the customer or when the services are performed. When contracts contain customer acceptance provisions, revenue is recognized upon the satisfaction of acceptance criteria. If products are stockpiled at the request of the customer, revenue is only recognized once the products have been inspected and accepted by the customer, and there is no right of return or replenishment on product expiry. The amount of revenue to be recognized is based on the consideration Novartis expects to receive in exchange for its goods and services. If a contract contains more than one performance obligation, the consideration is allocated based on the standalone selling price of each performance obligation.

Surgical equipment may be sold together with other products and services under a single contract. Revenues are recognized upon satisfaction of each of the performance obligations in the contract.

For surgical equipment, in addition to cash and installment sales, revenue is recognized under finance and operating lease arrangements. Arrangements in which Novartis transfers substantially all the risks and rewards incidental to ownership to the customer are treated as finance lease arrangements. Revenue from finance lease arrangements is recognized at amounts equal to the fair value of the equipment, which approximate the present values of the minimum lease payments under the arrangements. As interest rates embedded in lease arrangements are approximately market rates, revenue under finance lease arrangements is comparable to revenue for outright sales. Finance income for arrangements longer than twelve months is deferred and subsequently recognized based on a pattern that approximates the use of the effective interest method and recorded in “Other income”. Operating lease revenue for equipment rentals is recognized on a straight-line basis over the lease term.

The consideration Novartis receives in exchange for its goods or services may be fixed or variable. Variable consideration is only recognized when it is highly probable that a significant reversal will not occur. The most common elements of variable consideration are listed below:

- Rebates and discounts granted to government agencies, wholesalers, retail pharmacies, managed healthcare organizations and other customers are provisioned and recorded as a deduction from revenue at the time the related revenues are recorded or when the incentives are offered. They are calculated on the basis of historical experience and the specific terms in the individual agreements.

- Refunds granted to healthcare providers under innovative pay-for-performance agreements are provisioned and recorded as a revenue deduction at the time the related sales are recorded. They are calculated on the basis of historical experience and clinical data available for the product, as well as the specific terms in the individual agreements. In cases where historical experience and clinical data are not sufficient for a reliable estimation of the outcome, revenue recognition is deferred until the uncertainty is resolved or until such history is available.
- Cash discounts are offered to customers to encourage prompt payment and are provisioned and recorded as revenue deductions at the time the related sales are recorded.
- Shelf stock adjustments are generally granted to customers, primarily of the Sandoz Division, to cover the inventory held by them at the time the price decline becomes effective. Revenue deduction provisions for shelf stock adjustments are recorded when the price decline is anticipated, based on the impact of the price decline on the customer's estimated inventory levels.
- Sales returns provisions are recognized and recorded as revenue deductions when there is historical experience of Novartis agreeing to customer returns and Novartis can reasonably estimate expected future returns. In doing so, the estimated rate of return is applied, determined based on historical experience of customer returns and considering any other relevant factors. This is applied to the amounts invoiced, also considering the amount of returned products to be destroyed versus products that can be placed back in inventory for resale. Where shipments are made on a re-sale or return basis, without sufficient historical experience for estimating sales returns, revenue is only recorded when there is evidence of consumption or when the right of return has expired.

Provisions for revenue deductions are adjusted to actual amounts as rebates, discounts and returns are processed. The provision represents estimates of the related obligations, requiring the use of judgment when estimating the effect of these sales deductions.

### **Other revenue**

"Other revenue" includes royalty and milestone income from the out-licensing of intellectual property (IP) whenever Novartis retains an interest in the IP through a license and income from profit sharing arrangements with our collaboration partners. Royalty income earned through a license is recognized when the underlying sales have occurred. Milestone income is recognized at the point in time when it is highly probable that the respective milestone event criteria is met, and the risk of reversal of revenue recognition is remote. Other revenue also includes revenue from activities such as manufacturing or other services rendered, to the extent such revenue is not recorded under net sales, and is recognized when control transfers to the third party and our performance obligations are satisfied.

### 3. Significant transactions

#### Significant transaction in 2018

##### **Innovative Medicines – Acquisition of Advanced Accelerator Applications S.A.**

On October 30, 2017, Novartis entered into a binding memorandum of understanding with Advanced Accelerator Applications S.A., (AAA), a NASDAQ-listed company headquartered in Saint-Genis-Pouilly, France, under which Novartis agreed to commence a tender offer for 100% of the share capital of AAA subject to certain conditions. Novartis commenced the tender offer on December 7, 2017, to purchase all of the outstanding ordinary shares for a price of USD 41 per share and USD 82 per American Depositary Share (ADS), each representing two ordinary shares of AAA. The offer valued AAAs equity at USD 3.9 billion, on a fully diluted basis.

As of January 19, 2018, the expiration date of the tender offer, approximately 97% of the then outstanding fully diluted ordinary shares, including ordinary shares represented by ADSs (hereinafter collectively referred to as “the outstanding shares”), were validly tendered. On January 22, 2018, Novartis accepted and paid USD 3.9 billion for the outstanding shares tendered in the offer. On January 22, 2018, Novartis commenced a subsequent offering period that expired on January 31, 2018. As of the expiration of the subsequent offering period, an additional 1.8% of the outstanding shares were validly tendered. Novartis accepted and paid approximately USD 60 million, resulting in an increase in Novartis ownership in AAA to 98.7%

The fair value of the total purchase consideration was USD 3.9 billion. The preliminary purchase price allocation resulted in net identifiable assets of approximately USD 1.8 billion, non-controlling interests of approximately USD 0.1 billion and goodwill of approximately USD 2.2 billion. Results of operations since the date of acquisition were not material.

As of March 31, 2018 Novartis held 98.8% of the then outstanding fully diluted ordinary shares, including ordinary shares represented by ADSs.

AAA is a radiopharmaceutical company that develops, produces and commercializes molecular nuclear medicines, including Lutathera® (lutetium (177Lu) oxodotreotide), a first-in-class RLT product for neuroendocrine tumors (NETs) and a portfolio of diagnostic products. Radiopharmaceuticals, such as Lutathera®, are unique medicinal formulations containing radioisotopes, which are used clinically for both diagnosis and therapy.

#### Significant pending transaction entered into in March 2018

##### **Corporate – Pending divestment of 36.5 percent stake in GlaxoSmithKline Consumer Healthcare Holdings Ltd.**

On March 27, 2018, Novartis entered into an agreement with GlaxoSmithKline plc (GSK) to divest its 36.5 percent stake in GlaxoSmithKline Consumer Healthcare Holdings Ltd (GSK Consumer Healthcare) to GSK for USD13.0 billion in cash. The transaction is subject to GSK shareholder approval and is expected to close in [the second quarter] 2018.

The carrying value of the investment in GSK Consumer Healthcare has been reclassified to current asset and separately disclosed in the line Asset held for sale in the March 31, 2018 Consolidated balance sheet.

Four of the 11 directors of the GSK Consumer Healthcare board of directors are appointed by Novartis. The four Novartis directors will step down from the board upon completion of the divestment transaction.

## Significant pending transaction entered into in April 2018

### **Innovative Medicines – Pending acquisition of AveXis, Inc.**

On April 6, 2018, Novartis entered into an agreement and plan of merger with AveXis, Inc. under which Novartis will commence a tender offer to purchase all outstanding shares of AveXis Inc., a US-based Nasdaq-listed clinical stage gene therapy company, for USD 218 per share or a total of USD 8.7 billion in cash. In the event Novartis elects to extend the offer past July 6, 2018 (the Outside Date), the offer price will be increased by USD 7 per share to USD 225 per share. The tender offer and the merger are subject to customary closing conditions, including the tender of at least a majority of outstanding AveXis, Inc. shares on fully diluted basis and the expiration or termination of the waiting period under the Hart Scott Rodino Antitrust Improvements Act.

The merger agreement includes customary termination provisions for both AveXis Inc. and Novartis and provides for termination payments under specified circumstances. A termination by AveXis Inc. to accept another third party company's superior merger proposal (as defined in the merger agreement), would require AveXis Inc. to pay Novartis a fee equal to USD 284 million. A termination by Novartis under specified antitrust related circumstances, would require Novartis to pay to AveXis Inc. a "reverse termination fee" equal to USD 437 million. The Novartis termination fee increases in the event Novartis elects to extend the Outside Date, in accordance with the terms of the merger agreement, for each one-month period in the three-month extension period; to USD 542 million in the first month, USD 632 million in the second month and USD 722 million in the third month of the extension period.

On April 17, 2018, Novartis commenced the tender offer to purchase all the outstanding common stock of AveXis, Inc. for a price of USD 218 per share. The tender offer will expire on May 14, 2018, unless extended.

The transaction to acquire AveXis is expected to close around mid-2018 and is planned to be funded through available cash and short-term borrowing.

AveXis, Inc. is a clinical-stage gene therapy company focused on developing and commercializing novel treatments for patients suffering from rare and life-threatening neurological genetic diseases. AveXis Inc.'s initial product candidate, AVXS-101, is a proprietary gene therapy currently in development for the treatment of spinal muscular atrophy, or SMA, Type 1, the leading genetic cause of infant mortality, and SMA Type 2 and SMA Type 3. In addition AveXis Inc. has a pipeline of other novel treatments for rare neurological diseases, including Rett syndrome (RTT) and a genetic form of amyotrophic lateral sclerosis (ALS) caused by mutations in the superoxide dismutase 1 (SOD1) gene.

## Significant transactions in 2017

### **Innovative Medicines – Acquisition of Ziarco Group Limited**

On January 20, 2017, Novartis acquired Ziarco Group Limited, a privately held company in the United Kingdom, focused on the development of novel treatments in dermatology. This acquisition adds a once daily oral H4 receptor antagonist in development for atopic dermatitis (AD), commonly known as eczema, to complement the Novartis dermatology portfolio and pipeline. The fair value of the total purchase consideration was USD 420 million. The amount consisted of an initial cash payment of USD 325 million and the net present value of the contingent consideration of USD 95 million, due to the Ziarco shareholders, which they are eligible to receive upon achievement of specified development milestones. The purchase price allocation resulted in net identifiable assets of USD 395 million and goodwill of USD 25 million. The 2017 results of operations since the date of acquisition were not material.

### **Innovative Medicines – Acquisition of Encore Vision, Inc.**

On January 20, 2017, Novartis acquired Encore Vision, Inc., a privately-held company in Fort Worth, Texas, USA, focused on the development of a novel treatment in presbyopia. The fair value of the total purchase consideration was USD 456 million. The amount consisted of an initial cash payment of USD 366 million and the net present value of the contingent consideration of USD 90 million, due to the Encore shareholders, which they are eligible to receive upon achievement of specified development and commercialization milestones. The purchase price allocation resulted in net identifiable assets of USD 389 million and goodwill of USD 67 million. The 2017 results of operations since the date of acquisition were not material.

#### 4. Summary of equity attributable to Novartis AG shareholders

	Number of outstanding shares (in millions)			Issued share capital and reserves attributable to Novartis AG shareholders (in USD millions)

Derivative financial instruments			-88	-107					-88	-107
<b>Total financial liabilities at fair value</b>			<b>-88</b>	<b>-107</b>	<b>-983</b>	<b>-924</b>			<b>-1 071</b>	<b>-1 031</b>

There were no significant transfers from one level to the other and no significant transactions associated with level 3 financial instruments. During the first quarter of 2018, there were several individually non-significant transfers of equity securities from level 3 to level 1 for USD 70 million due to Initial Public Offerings.

The fair value of straight bonds amounted to USD 26.3 billion at March 31, 2018 (USD 23.8 billion at December 31, 2017) compared to the balance sheet value of USD 25.9 billion at March 31, 2018 (USD 23.0 billion at December 31, 2017). For all other financial assets and liabilities, the carrying amount is a reasonable approximation of the fair value. The carrying amount of financial assets included in the line financial investments and long-term loans of USD 2.4 billion at March 31, 2018 (USD 2.2 billion at December 31, 2017) is included in line "financial and other non-current assets" of the condensed consolidated balance sheets.

The Group's exposure to financial risks has not changed significantly during the period and there have been no major changes to the risk management department or in any risk management policies.

As of January 1, 2018, the Group implemented IFRS 9 Financial Instruments, refer to Note 2 and Note 7 for further details on the implementation impacts. 31/56

## Non-current financial debt – issuance of bonds

On February 7, 2018, Novartis issued the following straight bonds:

Coupon	Currency	Nominal amount (EUR million)	Maturity year	Issue price (USD million)	Carrying value Mar 31, 2018 (USD million)
0.5%	EUR	750	2023	99.655%	917
1.375%	EUR	750	2030	99.957%	920
1.7%	EUR	750	2038	99.217%	913

## 6. Legal proceedings update

A number of Novartis companies are, and will likely continue to be, subject to various legal proceedings, including litigations, arbitrations and governmental investigations, that arise from time to time. Legal proceedings are inherently unpredictable. As a result, the Group may become subject to substantial liabilities that may not be covered by insurance and may in the future incur judgments or enter into settlements of claims that could have a material adverse effect on its results of operations or cash flow. Note 19 to the Consolidated Financial Statements in our 2017 Annual Report and 2017 Form 20-F contains a summary as of the date of these reports of significant legal proceedings to which Novartis or its subsidiaries were a party. The following is a summary as of April 18, 2018 of significant developments in those proceedings, as well as any new significant proceedings commenced since the date of the 2017 Annual Report and 2017 Form 20-F.

### **INVESTIGATIONS AND RELATED LITIGATIONS**

#### **Greece investigation**

Novartis is investigating allegations of potentially inappropriate economic benefits to healthcare professionals, government officials and others in Greece. Novartis is providing information to the Greek authorities investigating these allegations and, in the first quarter of 2018, received a summons by the Greek Body of Prosecution of Financial Crime. Novartis is also responding to a subpoena and document requests from the US Securities and Exchange Commission and the US Department of Justice that it received in 2016 and 2017 in connection with such allegations and is cooperating with their investigation.

In addition to the matter described above, there have been other developments in the other legal matters described in Note 19 to the Consolidated Financial Statements contained in our 2017 Annual Report and 2017 Form 20-F. These do not significantly affect the assessment of management concerning the adequacy of the total provisions recorded for legal proceedings.

## 7. Impacts of adoption of new IFRS standards

Note 2 explains the changes and new accounting policies introduced on January 1, 2018 resulting from the adoption of the new accounting standards IFRS 9 Financial Instruments and IFRS 15 Revenue from Contracts with Customers.

The most significant impact from the adoption of IFRS 15 Revenue from Contracts with Customers relates to the timing of the recognition of income from upfront and milestone payments received under co-marketing and co-promotion agreements. Under IFRS 15, as these agreements are accounted for as a right to use license of IP, and the performance obligation to transfer the licenses to the counterparty to the agreement (the licensee) has been satisfied, revenue is recognized at the point in time when the upfront payment is received and when the milestone criteria is highly probable to be met. Under IAS 18, upfront and milestone payments received under co-marketing and co-promotion agreements were deferred and amortized to other revenue over the term of the agreements. Therefore, upon adoption of IFRS 15, the deferred revenue and related deferred taxes, in relation to the upfront payments and milestone payments received, have been derecognized and the impact accordingly recognized to retained earnings in the amount of USD 60 million.

The following table shows the changes to the line items of the January 1, 2018 Consolidated balance sheet by the adoption of IFRS 15:

(USD millions)	January 1, 2018	Adjustment IFRS 15	Adjusted January 1, 2018
<b>Assets</b>			
<b>Non-current assets</b>			
Deferred tax assets	8 229	-4	8 225
Total non-current assets	104 871	-4	104 867
<b>Total assets</b>	<b>133 079</b>	<b>-4</b>	<b>133 075</b>
<b>Equity and liabilities</b>			
<b>Equity</b>			
Reserves	73 299	60	73 359
<b>Total equity</b>	<b>74 227</b>	<b>60</b>	<b>74 287</b>
<b>Non-current liabilities</b>			
Deferred tax liabilities	5 168	12	5 180
Provision and other non-current liabilities	7 057	-69	6 988
<b>Total non-current liabilities</b>	<b>35 449</b>	<b>-57</b>	<b>35 392</b>
<b>Current liabilities</b>			
Provision and other current liabilities	11 203	-7	11 196
<b>Total current liabilities</b>	<b>23 403</b>	<b>-7</b>	<b>23 396</b>
<b>Total equity and liabilities</b>	<b>133 079</b>	<b>-4</b>	<b>133 075</b>

The adoption of IFRS 9 Financial Instruments had no impact to the line items of the January 1, 2018 consolidated balance sheet.

The amount by which the line items in the March 31, 2018 consolidated income statement and consolidated statement of cash flow were affected by the application of IFRS 15 Revenue from Contracts with Customers, as compared to IAS 18 Revenues and related interpretations was not significant.

The transition impact of IFRS 9 Financial Instruments was from the previously recognized unrealized gains accumulated in Other Comprehensive Income (OCI) in equity related to fund investments (USD 75 m) and on equity securities held by the Novartis Venture Fund (USD 102 m). The total amount of USD 177 million was transferred from OCI reserves into retained earnings on January 1, 2018. With

the adoption of IFRS 9, from January 1, 2018, these investments are measured at fair value through profit and loss (formerly under IAS 39 measured at fair value through OCI (FVOCI), with impairments recognized in profit and loss and gains recycled out of OCI to profit and loss at the date the financial instrument was divested).

There was no transition impact on financial instruments held for long-term purposes, recorded as long-term financial assets on the consolidated balance sheet, where the irrevocable FVOCI option was applied, as they continue to be measured at fair value through OCI. In subsequent periods, upon a divestment of these investments, the OCI reserves amount will be transferred directly to retained earnings. Prior to the adoption of IFRS 9, unrealized gains recognized in OCI reserves were recycled to profit and loss.

There is no significant impact from the new expected credit loss (ECL) impairment model under IFRS 9 to the Group's allowances and provisions for trade receivable, finance lease receivables and other short- and long-term receivables.

The following table shows the changes to the line items of the January 1, 2018 Consolidated statement of changes in equity by the adoption of IFRS 9 and IFRS 15:

(USD millions)	January 1, 2018	Adjustment IFRS 9	Adjustment IFRS 15	Adjusted January 1, 2018
Retained earnings	77 639	177	60	77 876
Total fair value adjustments	-4 340	-177		-4 517
<b>Total equity</b>	<b>74 227</b>		<b>60</b>	<b>74 287</b>

## 8. Subsequent events

For a significant transaction entered into on April 6, 2018, expected to close in the second quarter 2018, see Note 3.

## 9. Segmentation of key figures

The businesses of Novartis are divided operationally on a worldwide basis into three identified reporting segments, Innovative Medicines, Sandoz and Alcon. In addition, we separately report Corporate activities.

Reporting segments are presented in a manner consistent with the internal reporting to the chief operating decision maker which is the Executive Committee of Novartis. The reporting segments are managed separately because they each research, develop, manufacture, distribute and sell distinct products that require differing marketing strategies.

The Executive Committee of Novartis is responsible for allocating resources and assessing the performance of the reporting segments.

Following the internal reorganization, announced on October 24, 2017 and January 24, 2018, which was effective as of January 1, 2018, the reporting of the financial results of the reporting segments Innovative Medicines and Alcon have been adapted. The restatements reflect, in all years presented, the transfers of the Innovative Medicine Division ophthalmic over the counter products, together with a small portfolio of surgical diagnostics products to the Alcon Division. In order to comply with International Financial Reporting Standards (IFRS), Novartis has restated its consolidated income statement and balance sheet disclosures by segment to reflect this internal reorganization. This restatement had no impact on the reported financial results of the Sandoz Division, Corporate or the total Group.

Innovative Medicines researches, develops, manufactures, distributes and sells patented prescription medicines. The Innovative Medicines Division is organized into two global business units: Novartis Oncology, which consists of the global business franchise Oncology and Novartis Pharmaceuticals, which consists of the global business franchises Ophthalmology, Neuroscience, Immunology and Dermatology, Respiratory, Cardio-Metabolic and Established Medicines.

Sandoz develops, manufactures, distributes and sells prescription medicines, as well as pharmaceutical active substances, that are not protected by valid and enforceable third-party patents. Sandoz is organized globally in three franchises: Retail Generics, Anti-Infectives and Biopharmaceuticals. In Retail Generics, Sandoz develops, manufactures and markets active ingredients and finished dosage forms of pharmaceuticals to third parties. Retail Generics includes the areas of dermatology, respiratory, oncology, ophthalmics, cardiovascular, metabolism, central nervous system, pain, gastrointestinal, and hormonal therapies, as well as finished dosage form anti-infectives sold to third parties. In Anti-Infectives, Sandoz manufactures active pharmaceutical ingredients and intermediates, mainly antibiotics, for internal use by Retail Generics and for sale to third party customers. In Biopharmaceuticals, Sandoz develops, manufactures and markets protein or other biotechnology-based products, including biosimilars, and provides biotechnology manufacturing services to other companies.

Alcon researches, discovers, develops, manufactures, distributes and sells eye care products. Alcon is the global leader in eye care with product offerings in eye care devices and vision care. Alcon is organized into two global business franchises: Surgical and Vision Care. The Surgical franchise includes technologies and devices for cataract, retinal, glaucoma and refractive surgery, as well as intraocular lenses to treat cataract and refractive errors, like presbyopia and astigmatism. Alcon also provides viscoelastics, surgical solutions, surgical packs, and other disposable products for cataract and vitreoretinal surgery. The Vision Care franchise comprises daily disposable, monthly replacement, and color-enhancing contact lenses, a complete line of contact lens care products including multi-purpose and hydrogen-peroxide based solutions, rewetting drops and daily protein removers as well as a range of over-the-counter dry eye, eye allergy relievers and ocular vitamin products.

The divisions are supported by Novartis Institute for BioMedical Research, Global Drug Development, Novartis Technical Operations and Novartis Business Services. Corporate activities include Group headquarter functions and items that are not specific to one segment. Further details are provided in Note 3 to the Consolidated Financial Statements of the Annual Report 2017.

## **SUPPLEMENTARY INFORMATION (unaudited)**

### **Non-IFRS disclosures**

#### ***Core results***

The Group's core results – including core operating income, core net income and core earnings per share – exclude fully the amortization and impairment charges of intangible assets, excluding software, fair value adjustments on equity securities and fund investments held for strategic purposes and certain acquisition related items. The following items that exceed a threshold of USD 25 million are also excluded: integration and divestment related income and expenses, divestment gains and losses, restructuring charges/releases and related items, legal related items, impairments of property, plant and equipment and financial assets, as well as income and expense items that management deems exceptional and that are or are expected to accumulate within the year to be over a USD 25 million threshold.

Novartis believes that investor understanding of the Group's performance is enhanced by disclosing core measures of performance because, since they exclude items which can vary significantly from year to year, the core measures enable better comparison of business performance across years. For this same reason, Novartis uses these core measures in addition to IFRS and other measures as important factors in assessing the Group's performance.

The following are examples of how these core measures are utilized:

- In addition to monthly reports containing financial information prepared under International Financial Reporting Standards (IFRS), senior management receives a monthly analysis incorporating these core measures.
- Annual budgets are prepared for both IFRS and core measures.

Despite the use of these measures by management in setting goals and measuring the Group's performance, these are non-IFRS measures that have no standardized meaning prescribed by IFRS. As a result, such measures have limits in usefulness to investors.

Because of their non-standardized definitions, the core measures (unlike IFRS measures) may not be comparable to the calculation of similar measures of other companies. These core measures are presented solely to permit investors to more fully understand how the Group's management assesses underlying performance. These core measures are not, and should not be viewed as, a substitute for IFRS measures.

As an internal measure of Group performance, these core measures have limitations, and the Group's performance management process is not solely restricted to these metrics. A limitation of the core measures is that they provide a view of the Group's operations without including all events during a period, such as the effects of an acquisition, divestment, or amortization/impairments of purchased intangible assets and restructurings.

#### ***Constant currencies***

Changes in the relative values of non-US currencies to the US dollar can affect the Group's financial results and financial position. To provide additional information that may be useful to investors, including changes in sales volume, we present information about our net sales and various values relating to operating and net income that are adjusted for such foreign currency effects.

Constant currency calculations have the goal of eliminating two exchange rate effects so that an estimate can be made of underlying changes in the consolidated income statement excluding the impact of fluctuations in exchange rates:

- the impact of translating the income statements of consolidated entities from their non-USD functional currencies to USD; and

- the impact of exchange rate movements on the major transactions of consolidated entities performed in currencies other than their functional currency.

We calculate constant currency measures by translating the current year's foreign currency values for sales and other income statement items into USD using the average exchange rates from the prior year and comparing them to the prior year values in USD.

We use these constant currency measures in evaluating the Group's performance, since they may assist us in evaluating our ongoing performance from year to year. However, in performing our evaluation, we also consider equivalent measures of performance which are not affected by changes in the relative value of currencies.

### ***Growth rate calculation***

For ease of understanding, Novartis uses a sign convention for its growth rates such that a reduction in operating expenses or losses compared to the prior year is shown as a positive growth.

### ***Net debt and free cash flow***

Net debt and free cash flow are non-IFRS financial measures, which means they should not be interpreted as measures determined under IFRS. Net debt is presented as additional information because management believes it is a useful supplemental indicator of the Group's ability to pay dividends, to meet financial commitments and to invest in new strategic opportunities, including strengthening its balance sheet. Free cash flow is presented as additional information because management believes it is a useful supplemental indicator of the Group's ability to operate without reliance on additional borrowing or use of existing cash. Free cash flow is a measure of the net cash generated that is available for debt repayment, investment in strategic opportunities and for returning to shareholders. The definition of free cash flow used by Novartis does not include amounts related to changes in investments in associated companies nor related to acquisitions or divestments of subsidiaries. Free cash flow is not intended to be a substitute measure for cash flow from operating activities as determined under IFRS.

### The following are adjustments to arrive at Core Gross Profit

Cost of goods sold	-4 355	853	14	2	82	-3 404	-3 211
--------------------	--------	-----	----	---	----	--------	--------

### The following are adjustments to arrive at Core Operating Income

Selling, General & Administration	-3 923			6		-3 917	-3 469
Research & Development	-2 120	15	1	2	-9	-2 111	-1 984
Other income	407			-8	-301	98	210
Other expense	-491		4	26	206	-255	-321

### The following are adjustments to arrive at Core Income before taxes

Income from associated companies	152	212			11	375	352
----------------------------------	-----	-----	--	--	----	-----	-----

<sup>1</sup> Amortization of intangible assets: Cost of goods sold includes recurring amortization of acquired rights to in-market products and other production-related intangible assets; Research & Development includes the recurring amortization of acquired rights for technology platforms; Income from associated companies includes USD 212 million for the Novartis share of the estimated Roche core items.

<sup>2</sup> Impairments: Cost of goods sold and Research & Development include impairment charges related to intangible assets; Other expense includes charges related to the impairment of property, plant and equipment.

<sup>3</sup> Acquisition or divestment of businesses and related items, including restructuring and integration charges: Cost of goods sold, Selling, General & Administration, Research & Development and Other expense include charges related to an acquisition; Other income and Other expense also include transitional service-fee income and expenses and other items related to the portfolio transformation.

<sup>4</sup> Other items: Cost of goods sold and Other expense include net restructuring and other charges related to the Group-wide rationalization of manufacturing sites; Research & Development, Other income and Other expense include other restructuring income and charges and related items; Cost of goods sold and Other expense include charges related to changes in a contractual agreement; Research & Development also includes fair value adjustments to contingent consideration liabilities and amortization of option rights; Other income also includes gains from divestments of product rights, property, plant and equipment and fair value adjustments on financial assets; Other expense also includes legal-related items and fair value adjustments on financial assets; Income from associated companies includes an adjustment of USD 11 million for the Novartis share of the estimated GSK Consumer Healthcare Holdings Ltd. core items.

<sup>5</sup> Taxes on the adjustments between IFRS and core results take into account, for each individual item included in the adjustment, the tax rate that will finally be applicable to the item based on the jurisdiction where the adjustment will finally have a tax impact. Generally, this results in amortization and impairment of intangible assets and acquisition-related restructuring and integration items having a full tax impact. There is usually a tax impact on other items, although this is not always the case for items arising from legal settlements in certain jurisdictions. Adjustments related to income from associated companies are recorded net of any related tax effect. Due to these factors and the differing effective tax rates in the various jurisdictions, the tax on the total adjustments of USD 1.1 billion to arrive at the core results before tax amounts to USD 162 million. The average tax rate on the adjustments is 14.5%, since the estimated full year core tax charge of 15.4% has been applied to the pre-tax income of the period.

<sup>6</sup> Earnings per share (EPS) is calculated on the amount of net income attributable to shareholders of Novartis AG.

## Disclaimer

This press release contains forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995, that can generally be identified by words such as “to become,” “outlooks,” “momentum,” “positive CHMP opinion,” “expected,” “on track,” “potential,” “strategy,” “to become,” “agreed to be sold,” “strategic,” “priorities,” “Agreement to acquire,” “positions,” “pipeline,” “subject to,” “began,” “expect,” “if completed,” “to provide,” “will,” “proposed,” “to build,” “continue,” “plan,” “strategic review,” “progressing,” “potential,” “likely,” “growth drivers,” “clinical development,” “ongoing,” “if completed,” “would,” “platform,” “to accelerate,” “investigational,” “initiated,” “submission,” “planned,” “recommended,” “to advance,” “aims,” “plans,” “launch,” “priority,” “outlook,” “launched,” “priority review,” “fast track,” “breakthrough therapy,” “filed,” “filing,” or similar expressions, or by express or implied discussions regarding potential new products, potential new indications for existing products, or regarding potential future revenues from any such products; or regarding the potential outcome of the tender offer for the shares of AveXis Inc. to be commenced by Novartis, and the potential impact on Novartis of the proposed acquisition, including express or implied discussions regarding potential future sales or earnings of Novartis, and any potential strategic benefits, synergies or opportunities expected as a result of the proposed acquisition; or regarding the potential outcome of the strategic review being undertaken to maximize shareholder value of the Alcon Division; or regarding the potential financial or other impact of the significant acquisitions and reorganizations of recent years; or regarding potential future sales or earnings of the Novartis Group or any of its divisions or potential shareholder returns; or by discussions of strategy, plans, expectations or intentions. You should not place undue reliance on these statements. Such forward looking statements are based on our current beliefs and expectations regarding future events, and are subject to significant known and unknown risks and uncertainties. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those set forth in the forward looking statements. There can be no guarantee that any new products will be approved for sale in any market, or that any new indications will be approved for any existing products in any market, or that any approvals which are obtained will be obtained at any particular time, or that any such products will achieve any particular revenue levels. Neither can there be any guarantee that the proposed tender offer or the acquisition described in this press release will be completed, or that it will be completed as currently proposed, or at any particular time. Nor can there be any guarantee that Novartis will be able to realize any of potential strategic benefits, synergies or opportunities as a result of the proposed acquisition. Nor can there be any guarantee that the strategic review being undertaken to maximize shareholder value of the Alcon Division will reach any particular results, or at any particular time, or that the result of the strategic review will in fact maximize shareholder value. Neither can there be any guarantee that Novartis will be able to realize any of the potential strategic benefits, synergies or opportunities as a result of the significant acquisitions and reorganizations of recent years. Neither can there be any guarantee that shareholders will achieve any particular level of shareholder returns. Nor can there be any guarantee that the Group, or any of its divisions, will be commercially successful in the future, or achieve any particular credit rating or financial results. In particular, our expectations could be affected by, among other things: global trends toward health care cost containment, including government, payor and general public pricing and reimbursement pressures and requirements for increased pricing transparency; regulatory actions or delays or government regulation generally, including potential regulatory actions or delays relating to the completion of the potential acquisition described in this release, as well as potential regulatory actions or delays with respect to the development of the products described in this release; the potential that the strategic benefits, synergies or opportunities expected from the proposed acquisition may not be realized or may take longer to realize than expected; the successful integration of AveXis into the Novartis Group subsequent to the closing of the transaction and the timing of such integration; potential adverse reactions to the proposed transaction by customers, suppliers or strategic partners; dependence on key AveXis personnel and customers; the potential that the strategic benefits, synergies or opportunities expected from the significant acquisitions and reorganizations of recent years may not be realized or may take longer to realize than expected; the inherent uncertainties involved in predicting shareholder returns; the uncertainties inherent in the research and development of new healthcare products, including clinical trial results and additional analysis of existing clinical data; our ability to obtain or maintain proprietary intellectual property protection, including the ultimate extent of the impact on Novartis of the loss of patent protection and exclusivity on key products which commenced in prior years and will continue this year; safety, quality or manufacturing issues; uncertainties regarding actual or potential legal proceedings, including, among others, actual or potential product liability litigation, litigation and investigations regarding sales and marketing practices, intellectual property disputes and government investigations generally; uncertainties involved in the development or adoption of potentially transformational technologies and business models; general political and economic conditions, including uncertainties regarding the effects of ongoing instability in various parts of the world; uncertainties regarding future global exchange rates; uncertainties regarding future demand for our products; and uncertainties regarding potential significant breaches of data security or data privacy, or disruptions of our information technology systems; and other risks and factors referred to in Novartis AG’s current Form 20-F on file with the US Securities and Exchange Commission. Novartis is providing the information in this press release as of this date and does not undertake any obligation to update any forward-looking statements as a result of new information, future events or otherwise.

This announcement is neither an offer to purchase nor a solicitation of an offer to sell securities. The tender offer for the shares of common stock of AveXis, Inc. described in this announcement has commenced and is being made pursuant to a tender offer statement on Schedule TO-T and related materials filed by Novartis and an indirect wholly owned subsidiary with the U.S. Securities and Exchange Commission (the “SEC”). In addition, AveXis, Inc. has filed a Schedule 14D-9 Solicitation/Recommendation Statement with the SEC. The Schedule TO Tender Offer Statement (that includes an offer to purchase, a related letter of transmittal and other offer documents) and the Schedule 14D-9 Solicitation/Recommendation Statement contain important information that should be read carefully before any decision is made with respect to the tender offer. These materials and all other documents filed by, or caused to be filed by, Novartis and an indirect wholly owned subsidiary and AveXis, Inc. with the SEC are available at no charge on the SEC’s website at [www.sec.gov](http://www.sec.gov). The Schedule TO Tender Offer Statement and related materials also may be obtained for free under the “Investors—Financial Data” section of Novartis’s website at <https://www.novartis.com/investors/financial-data/sec-filings>. The Schedule 14D-9 Solicitation/Recommendation Statement and such other documents also may be obtained for free from AveXis, Inc. under the “Investor + Media” section of the AveXis, Inc.’s website at <http://investors.avexis.com/phoenix.zhtml?c=254285&p=irol-IRHome>
