smartfinds marketing

Outdated Website? Let's Modernize It — Fast.

When your website needs a refresh, not a reinvention, we move fast — and smart.

The SmartFinds Difference: Website Assembly

Most companies either overspend on custom development — or cut corners with freelancers. SmartFinds Marketing offers a third path: Website Assembly.

This is a strategic, rapid-build service for businesses that need a modern website quickly — without the 6-month timeline or enterprise budget.

Perfect for companies that:

- ✔ Have an existing website but need a full visual and structural refresh
- ✔ Want to launch fast while planning a future rebrand
- ✔ Need a credible online presence to support current sales efforts
- ✔ Are expanding services and need room to scale

How It Works

We start with your existing content and structure, then rebuild it using WordPress and the Avada theme — allowing for speed, flexibility, and future growth. We lead creative direction with light adjustments, enhanced layouts, and stock visuals when needed.

- ✔ Modern customization, responsive layout, and design enhancements
- ✔ Menu restructure, simplified UX, and optimized CTAs
- ✔ Development site for testing and quality control
- ✔ Post-launch Dev + Live site sync system for safe updates

Delivery Timeframe

Project timeline is based on content volume — typically 30–45 days per 100 pages, assuming client responsiveness.

Why This Works

- ✔ Faster launch. Less cost. No bloat.
- ✔ Keeps your marketing moving while larger changes are in progress
- ✔ Positions your brand professionally, without the downtime
- ✔ Scalable and editable for future growth or redesigns

Sound familiar?

Your site looks outdated compared to competitors

Navigation is confusing, or mobile performance is lagging

The design doesn't reflect your current business

Your marketing team can't update content efficiently
