## Caravan Health Accountable Care Symposium December 6 & 7, 2017

The Caravan Health Accountable Care Symposium is the nation's most innovative and influential event in population-based payment models. The event will convene hundreds of healthcare leaders from across the country to foster new ideas for engineering their health systems into population health success. Caravan Health and its ACO partners outperformed national metrics among new ACOs in 2016 by a factor of 20, with more than 90% on track to generate savings in 2017. They will share their best practices for ACO management, population health engineering, navigating MACRA and MIPS, and other key elements of a strategic vision for improved clinical and financial performance.

This year's program will feature thought leaders, industry experts, panel discussions and breakout sessions that will address the most pressing concerns of health system leaders today. Attendees will gain practical knowledge that will accelerate their transformation plans for superior quality and financial results. Hear about real improvements in patient and caregiver lives that have come from practice transformation and how you can apply it in your health system.

The symposium will take place at the beautiful Hilton Squaw Peak Resort. For tickets and event information, visit [www.CaravanHealth.com/symposium](http://www.CaravanHealth.com/symposium).
