

6 SIMPLE STEPS TO GET STARTED WITH iJility™

At **iJility**, we believe in making the workforce optimization process simple and transparent. Here's what you can expect when partnering with us, from the initial discovery call to full implementation of your tailored solution. Rest assured, we're with you every step of the way.

OUR PATHWAY TO OPERATIONAL EXCELLENCE

STEP 1 DISCOVERY CALL

Objective: Understand your operational needs and pain points.

During the discovery call, we'll dive deep into your current challenges, operational objectives, and areas of opportunity. We'll assess key factors like your service levels, labor needs, and cost structure. This is where we start building a clear picture of how **iJility** can help optimize your operations and offer a guaranteed cost savings.

STEP 2 ON-SITE ASSESSMENT

Objective: Analyze your workflow, gather data, and validate your current cost and processes.

Our team of engineers and operational experts will visit your facility to conduct a thorough on-site assessment. We'll observe your current workflows, evaluate productivity levels, and identify potential bottlenecks. After the **iJilitySTUDY™**, our team will validate the steps within your process and the current cost to perform the work. Our **iJilitySTUDY™** will determine the tailored solutions we propose and the metrics we use to track progress.

STEP 3 CUSTOMIZED SOLUTIONS DESIGN

Objective: Create a tailored plan to optimize your operations.

Using the data from the on-site assessment, we'll design a customized solution that fits your specific operational needs. Whether it's workforce optimization, cost-per-unit (CPU) modeling, or process improvements, we'll ensure the plan aligns with your goals for efficiency, cost reduction, and quality improvements.

STEP 4 PROPOSAL PRESENTATION

Objective: Present the solution and establish next steps.

In this step, we'll present our proposed solution to key stakeholders in your organization. This includes detailing how we'll implement the solution, the expected outcomes, and the timeline for execution. We'll answer any questions you have and ensure you're fully confident in moving forward.

STEP 5 IMPLEMENTATION

Objective: Seamlessly integrate our solution into your operations.

Our **iJility** team will be on-site to oversee the implementation of your tailored solution. From workforce onboarding to process improvements, we'll manage every detail to ensure a smooth transition. This phase includes ongoing training, cross-training, and deploying digital tools for real-time monitoring.

STEP 6 CONTINUOUS MONITORING & IMPROVEMENT

Objective: Track progress and drive continuous improvements.

Once the solution is in place, we won't stop there. We'll continuously monitor key performance indicators (KPIs), including productivity, cost savings, and quality improvements. Regular reporting and feedback ensure that we're always making adjustments to drive further success.

READY TO ELEVATE YOUR WORKFORCE?
